

# THE BLAIRMORE ENTERPRISE

VOL. XIV, NO. 23.

BLAIRMORE, ALBERTA, THURSDAY, JUNE 7, 1923.

\$2.00 YEARLY

The Dominion Water Powers Branch at Calgary have prepared estimates showing that one inch of rainfall on a quarter section of land represents 18,000 tons of water. In the recent storm in the Calgary district 4.32 inches of rain fell, which means that 78,105 tons of water fell on every quarter section in the district.

In our reference last week to an appeal being entered against a conviction under the liquor act handed down in connection with a Granum farmer, we were in error in stating that the judgment was handed down by Magistrate Gresham. It was the judgment of the district magistrate, Mr. McLean.

## CARD OF THANKS

In the hour of their bereavement, Mr. and Mrs. Mike Joyce desire to thank all who assisted towards the rescue of their dear little son Harold, and for the many expressions of sympathy extended to them in the great loss they are called to bear.

Also would they thank the many helping hands that came to their assistance when their home was endangered by the floods.

## ST. LUKE'S ANGLICAN CHURCH

Sunday, June 10th, Second Sunday after Trinity.  
Holy Communion 9 a.m.  
Catechism 2.30 p.m.  
Holy Baptism 7 p.m.  
Evensong and Sermon 7.30 p.m.  
All services will be taken by the Rev. W. J. Merrick, M.A., rector and rural dean of Macleod.

As a result of the recent rise in the price of sugar the U. S. government moved to close the New York Cobs and Sugar Exchange on the ground that the dealings thereon were almost wholly speculative and that they were chiefly responsible for the sensational increase in sugar prices. A more hopeful means of bringing down the cost of sugar was taken by the women who organized movements to stop buying until the price dropped. Speculation has unquestionably lifted sugar too high, but it has been speculation based on a real belief that the supply of sugar was not going to be equal to the demand. We think it will be approximately equal anyway; it will certainly be equal if people buy less sugar, and sugar is a necessity of life of which we use more than is either necessary or entirely wholesome—merely because we like it.

## FLOOD DAMAGE MAY REACH QUARTER MILLION

Damages to railway tracks, streets, roads, bridges and private properties throughout this district as a result of the recent floods may be conservatively estimated at a quarter of a million dollars. This would not include damage to mines through flooding and loss of trade, together with labor which has been almost completely knocked out. It will be at least a month before conditions will become anything like normal. At present only a few men are working in or around the mines, and as the railway tracks and bridges are damaged considerably, it will be some time before coal can be shipped to outside markets.

All through the Crow's Nest Pass, from Fernie to Pincher, great damage was wrought. Besides the washing away of railway tracks and bridges, auto roads and bridges, houses have been bereft of their foundations, gardens swept of their roots, and damage beyond estimation done to contents of basements.

The greatest damage was done in West Coleman and Central Blairmore, where some buildings were completely swept from their foundations and twisted beyond repair. The new cement bridge built last year in East Coleman met a fate similar to that of the Lyon Creek Victoria bridge at Blairmore and the structure lies a complete ruin partially embedded in loose rocks and logs. The Victoria bridge has practically fallen to pieces, despite the reinforcement that stood inspection last fall. The spur bridge at Hillcrest lost several piers. The spur bridges at Blairmore were considerably damaged through dynamite used to free the structures from logs and stumps. The main auto road both east and west of Blairmore was undermined in sections so as to be almost impassable.

Words come from Cowley that the river has taken a course near the South Fork bridge, following the old river bed along the eastern embankment.

Near Michel several small culverts were washed out, but the main bridges held their positions fairly well.

Trains have been very much off schedule, but the C. P. R. have been using every effort to give the district service. Hundreds of men have been employed gathering rock with which to ballast the roadbed. A pile-driver is in operation between Blairmore and Coleman.

Locally, schools and other institutions were obliged to close owing to flooded furnaces.

Until the Victoria Street bridge is rebuilt or repaired all through traffic has to go by way of the State Street bridge.

## SIXTH AVENUE BRIDGE GOES

The heavy current in the Old Man river has undermined the cement piers of the Sixth Avenue bridge, and the bridge collapsed last evening. Fortunately no one was on the bridge at the time.

This bridge has served the people of the north sub-division for years and was the only way to get to the cemeteries.

The Lyon Creek has since the flood adopted a new course some fifty feet away from the Dearborn Street bridge.

At a special meeting of the council last night it was decided to replace the Dearborn Street bridge and to erect a four-foot wide footbridge over the Old Man river at Sixth Avenue. Victoria Street bridge will be fenced off awaiting some action of the government.

The water main on Victoria Street was broken by the fall of the bridge and for several days five blocks along that street have been without water. This is being somewhat relieved to-

## Money Waste

The middle aged man, mindful of his past will urge you not to waste small sums. He will tell you too, with a sigh of regret, what he might have accomplished had he, years ago, realized the multiplying power of trifling sums.

Stop all the waste you can, and keep your money in a savings account where it will grow to help your future.

Double your Savings. It CAN be Done.

day through the installation of a gate valve at the corner of Ninth Avenue thus assuring water for three blocks. The district from Ninth Avenue to Tarellth will be served temporarily by a surface pipe.

The town will permit light traffic only over the State Street bridge, all heavy traffic having to go by way of Dearborn and Main Streets, south of the track.

The council will ask the C. P. R. to dump several carloads of Slide rock here for the use of the town.

The C. P. R. watering tank at Frank was put out of commission by the force of water and timber from Gold Creek. Until repairs are effected, engines are being watered in Blairmore.

The Blairmore School Board will sit as a Court of Revision at the school house on Saturday, June 9th, at 10 a.m.

## BOY FALLS VICTIM TO FLOOD

On Friday evening last, as the torrents in Lyon Creek were at their highest, Harold Evan Joyce, aged nine and a half years, youngest child of Mr. and Mrs. Mike Joyce, had the misfortune to fall in and was carried down by the swift current. Several futile efforts were made to rescue him. The body was finally located on a sand bar in the middle of the stream at a point about 500 yards from where he had tumbled in. All efforts towards resuscitation were of no avail and it is thought that death resulted, partly through wounds sustained coming into contact with stones and other objects in the river. The body was removed to the home of the grief-stricken parents, where a brief coroner's inquest was held. It was

decided that a summary inquest was not necessary.

The remains were laid to rest in the Blairmore cemetery on Monday afternoon, following a short funeral service at the home, conducted by Rev. A. W. Neale.

Harold was one of the most popular lads in the community and a real pet of the home. With the bereaved parents we join in sincerest sympathy.

Floral tributes were many and included:

Wreaths—Family; Granmother, Uncle Bill and Uncle Jim; Uncle Sam and Auntie Mary, Lena and Billy; Uncle Walter and Auntie Nellie and family; Uncle Jack and Auntie Mary and family; Uncle Mark and Auntie Nance and Annie; Cross from Principal, Staff and Pupils of Blairmore Public and High School; Wreaths—Mrs. Walter Howe (Sunday School Teacher); Mr. and Mrs. Isaac Stevenson, Crowview Rebekah Lodge No. 66; Spray from Blairmore Lodge No. 65, L.O.O.F.; Wreaths, Officials Greenhill Mine; Wreaths Gladys and Donald McKinnon, Mr. and Mrs. Albert Oleson; Sprays, Mr. and Mrs. Owen Morgan and family, David and James Kemp, Mr. and Mrs. W. W. Scott and family, Mr. and Mrs. G. Evans, Mr. and Mrs. W. McVey, Mr. and Mrs. Jack Patterson, Agnes Kemp; Alice, Dorothy and Mamie Hamilton; Mr. and Mrs. T. Barnes; Harry, Frank, Alice and Albert Thomson; Gladys, Frank and Joe Morgan.

Blairmore's tourist campsite has been a picture since the flood started. For several days it was covered by a flowing stream of an average depth of about three feet. The cookhouse and its contents decided to stay in position and will be there to invite the passing tourist, as was intended.

(Continued)

"I could see by the tracks that there was a number of 'em; as many as five or six; the old man seemed to follow their signs as far as I could, but I lost it at the creek. Then I went back to the house and met some of the boys out to scout around before I come down here after you."

"Where do you suppose they could have taken him?" Townbridge asked. "They'd never dare bring him to town."

"Gawd knows, Lem! There's more pockets and drifts up in these hills than there is jack-rabbits. Tain't likely the boys'll find no sign, but I guess they'll find it, not before that of a Moran—'it was him did it, damn him! I know it. Lem! For Gawd's sake, what are we goin' to do?"

"The first thing to do, Bill, is to get you out of this town, before Thomas shows up and jumps you. I don't want to see you here."

"Lucky, he's away just now," Townbridge went on. "Come with me! He led the way into the hotel. 'Frank,' he said to the red-headed receptionist, 'is Moran in town to-day?'"

"Nope," the Irishman regarded Santy with interest. "He went out this morning with four or five men."

"Rehilly's here, ain't he?" Townbridge asked them. "Tell him there's two gentlemen here see him. Needsn't mention any names. He don't know 'em."

"When Santy, with the instinct of his breed, hitched his revolver to a more convenient position on his hip, Townbridge reached out and took it away from him. He dared not trust the old man in his present mood. He intended to question the Senator to probe him, perhaps to threaten him; but the time had not come to shoot him."

"'I'll keep this for you, Bill,' he said soothingly, and dragged the weapon into his coat pocket. 'I'm going to take you up with me, for the sake of the effect of that face of yours, looking the way it does right now. But I'll take long. We're going to act some, too.'"

Their visit had no visible effect upon Rehilly, however, who was too much master of himself to be caught off his guard in a game which had reached the point of constant surprise. His manner was friendly, but he did not appear to be perturbed by it. He had not supposed that the entrance he had anticipated could be carried through without difficulty, and he was prepared to meet any attack that might be offered by the man who had been so successful in the past.

"Senator Rehilly," Townbridge introduced himself, "you're never away from the place. You're a good man. My name is Townbridge."

# DODD'S KIDNEY PILLS

THEY'RE THE ONLY

THEY'RE THE ONLY

THEY'RE THE ONLY

"Yes," the Senator added, "I've heard of you. I know your name from your sign." He improved slightly over the word "friend" as he glanced over the sign. "There's a warning out for him, I believe."

"Yes. There's a warrant out for you—your friends, too, 'Tug Bailey,' Townbridge repeated dryly, hoping that something would emanate from his remarks; but nothing did. "If the news surprised Rehilly, at least it didn't show it. 'I've just sworn it out,' the rancher continued, 'but that's not why I'm here. I'm here to tell you that Gordon Wade, whom you know, has been kidnapped. Santy stirred an exclamation of rage in answer to a quick look from his friend."

"Kidnaped from his own range in broad daylight," the latter went on. "I represent his friends, who mean to find him right away, and if it has occurred to me that you may be able to assist us in our search."

"I don't see what idea occurred to you," Rehilly asked calmly, as though out of mere curiosity. "I'd like to instantly answer you."

A bit baffled by this attitude of composure, Townbridge hesitated, for it was not of composure, he expected, but of defiance. "If the Senator had flown into a passion, the cattleman would have recoiled with surprise. But he was less sure of himself and his ground. It was barely possible, after all, that the Bailey had shot Jordan out of personal spite, or, at the worst, had been the tool of Moran alone. One could hardly associate the thought of murder with the very person looking like a gentleman, who so calmly faced them and twined his eyes between his fingers as he listened."

"Why should that idea have occurred to you?" the Senator asked again. "So far as I am informed, you are also liable to arrest for complicity in the Jensen murder; in addition to which he has offered to deliver me and burglarized my office. It seems to me, if he has been kidnapped as you say, that I am the person to have any interest in his welfare, or his whereabouts. Why do you come to me in this way?"

"This was too much for Santy's self-restraint."

"What's the use of talkin' to him?" he demanded. "If he ain't done it himself, don't we know that Moran is it for him? He shook a gaunt old man at Rehilly, who paid no attention whatever to his words, but merely looked at him with a cold, steady gaze."

"That is why we are here," said Townbridge, when he had quieted Santy once more. "Because we have good reason to believe that, if these fellows do not proceed from you, they do proceed from your agent, and you're responsible for what he does, if I know anything about him."

"So far as I know," the old man replied, "he has carried things with a high hand in this community, but now he's come to the end of his rope, and he's going to be hanged. That's all. You'll get your own, too, if he's acted under your orders." The cattleman's eyes were fixed on Santy, as if he were waiting for a sign that the first moments of his embarrassment were passed. His voice came with a suddenness that was quick to recognize, although he gave no evidence that he was surprised. "You're a good man, Santy, that's what we want to know."

"My dear fellow," Rehilly laughed heartily. "I don't see how you can be so sure of that. You'll see how absurd this is."

"A frank answer to a frank question," Townbridge persisted. "Has he been acting for you? Do you, at this moment, know where he is?"

"That's the stuff!" growled Santy, whose temper was beginning to show the effort he put forth to hold himself within bounds. "He's in town to-day."

"That's the stuff!" growled Santy, whose temper was beginning to show the effort he put forth to hold himself within bounds. "He's in town to-day."

"That's the stuff!" growled Santy, whose temper was beginning to show the effort he put forth to hold himself within bounds. "He's in town to-day."

Leon Townbridge had seen only one woman shot, but the conviction had indelibly impressed upon his mind. It had happened in his boyhood, at the ranch where he still lived, when a messenger had arrived with word of the death of the older Townbridge, whose horse had stepped into a granite mine and fallen with his rider. The picture of his mother's collapse he could not forget, or his own terrible thought that she, too, had passed away, leaving him parentless. The months afterwards he had been ashen at night, crying out that she was dead.

The whole scene returned to him when he told Detective of Wade's appearance, and saw her face flash and then pale, as his mother's had done. The girl did not actually faint, for she was young and wonderfully strong, but she came so near to it that he was obliged to support her with his arm to keep her on her feet. That was cruel, too, for he loved her. But presently she had recovered and, with his mind all thought of himself by her pleasings appeal to him to do instantly in search of her.

"We'll find him, Dorothy, don't you worry," he declared, with an appearance of confidence, but he knew his own feeling. "I came around to tell you myself because I wanted you to know that he was right on the edge of the canyon."

"But how can you find him in all these mountains, Lem? You don't know which side of the range they've hidden him on."

"He reminded her that he had been born in Crawling Water Valley, and that he knew every dried creek and gulch in the mountains; but in his heart he realized that to search all these places would take half a lifetime. He could only hope that chance, or good fortune, might lead them promptly to the spot they sought."

"Do you think that Senator Rehilly knows where Gordon is?" she asked, in this line.

"I don't know for sure," he answered. "I believe Moran is acting on Rehilly's orders. This morning how much Rehilly knows of the details. If I knew that, it would be thirty times as much."

"Oh, I was only something I could do," Dorothy waited helplessly. "A man's head is a very good thing in a crisis but not here. Her distress was so pitiable to witness that Townbridge could not help but say, 'What can I do?'"

"We'll do all that can be done, Dorothy," he assured her. "Trust me. I'll find him, or I'll die trying. I'll find him, or I'll die trying. I'll find him, or I'll die trying."

"We'll do all that can be done, Dorothy," he assured her. "Trust me. I'll find him, or I'll die trying. I'll find him, or I'll die trying. I'll find him, or I'll die trying."

"We'll do all that can be done, Dorothy," he assured her. "Trust me. I'll find him, or I'll die trying. I'll find him, or I'll die trying. I'll find him, or I'll die trying."

## Forbidding Region

### Below Sea Level

#### Great Cities Found in Ruins in Chinese Turkestan

There is a place in Chinese Turkestan, called Lanchow, that is far below the sea level. This forbidding region is one of the most interesting in the world. Everywhere in it are found ruins of human habitation. Great cities are here, with their mines, farms and industries, dead as though time had stricken them as they stood.

Where Atlantis stood high the gulf stream passed on one side of it and Arctic currents on the other, but there was little or no intermingling of the waters. In consequence storms as they passed here were deflected into the Europe exactly as Alaskan weather comes to the United States.

But the instant there was a gate by which the Gulf Stream could enter the Arctic Ocean all this was changed. A great action which was set up which drove the water from all surface contact with the ocean and switched them into the upper air, to descend, dry and thirsty, on Turkestan.

There is every reason to believe, scientists say, that this is the true explanation for the sinking of Atlantis and the North Sea correspond in time to the formation of the deserts in Asia and Africa.

Improved Health Of Canada's Livestock

### Large Sums Paid in Compensation for Animals Slaughtered

In five months in 1916-17, according to statistics given in the Veterinary Director-General's report for 1917-22, there were 1,287 animals slaughtered in Canada and \$198,981 paid in compensation, in the effort to suppress glanders; whereas in 1921-22 there were only 29 animals slaughtered on that account in the full year and \$2,086 paid in compensation. In like manner in 1914-15, there were 24,772 swine slaughtered, and \$198,981 paid in compensation, in the campaign against hog cholera; while in 1921-22 only 432 pigs were sacrificed and \$1,129 paid in compensation. In the suppression of dourine, 471 animals were slaughtered and \$48,745 paid in compensation in 1913-14, whereas in 1921-22 no animals had to be slaughtered and no compensation was paid.

In the checking of tuberculosis, there was a large increase in 1921-22, both in swine slaughtered and compensation paid, due to the adoption of the Accredited Herd system and to the control of tuberculosis in municipalities under the municipal tuberculosis order of 1915-16. The per centage of swine in municipal testing was 5.8, while in the accredited herds the per centage was 14.73.

"A vehicle with three wheels is called a tricycle and one with two wheels is a bicycle," said the teacher. "Now, I think you would call a vehicle with one wheel."

"A wheehurrow," promptly answered the little fellow.

Your friends think that you are right and your enemies think that you are wrong. The only way to show the rest of the world, sympathetic world.

ITCHING BURNING EZEZEMA ON SCALP

In Pimples. Formed Hard Crust. Hair Fall Out. Cuticura Healed.

"I had eczema on my scalp. It broke out in little pimples which formed a hard crust. My scalp itched and burned so badly I went up half the night. My hair fell out terribly and I could not sleep."

"This trouble lasted about two months before I went for a consultation with Dr. J. C. Gossard, 200 King St. West, Toronto. I bought some and I used two boxes of Cuticura Ointment with the Cuticura Soap. I was healed."

## "YOUR TEETH"

### EXPRESSION

By Ben Proctor McGee, M.D., D.D.S., Pittsburgh, Pa.

When you look at other people, your impression of them is governed very largely by the expression that you find upon their faces.

We commonly speak of "the expression of the eyes," and we have long continued the use of that phrase that we really think the eyes have expression, but the movement of the eye-ball and the opening and closing of the lids, is what make the so-called expression of the eyes. The upper lid has only an up-and-down motion, so that it could not be very expressive; but the lower lid can be moved upward and downward and can be pushed about by the muscles of the face so as to make a series of pleasant looking wrinkles about the corner of the eye.

More than seventy-five per cent of facial expression is due to the muscles of mastication. These are supported upon the teeth and the bones surrounding the teeth that depend for their shape upon the stability of the teeth. We are safe therefore in saying that the great majority of all facial expression, either pleasant or unpleasant, is due to the teeth and dependent for its support, and, consequently, its appearance, upon the teeth.

In addition to the movement of the muscles of the face, the appearance of the teeth is due to the region that is very large element of expression. If you look at a mouth full of clean, pearly, well-shaped, healthy teeth surrounded by natural pink gums, you get immediately a pleasing effect that is of all proportion to the general appearance of the face in fact, many faces that are most unexpressive when in repose, are extremely attractive when they smile, because of a splendid dental equipment. If a most beautiful woman shows, when she smiles, either an irregular, or a decayed, or a stunted set of teeth, she has better not smile, because her reputation for beauty disappears at the first glance.

"If a man who wished to talk business with you was well-groomed and generally pleasing in appearance, and when he opened his mouth, showed a collection of dental wrecks, he would immediately lose the psychological advantage that he had gained by his first appearance."

In order to be charitable to other people, and to create a good impression upon other people, it is necessary for us all to look the best we can at all times. And if you are going to look your best, your teeth must be in good order.

English Girls Investigate Canadian Farm Methods

### Four Farmettes Are Making a Tour of the Country

Four English farmettes, winners of scholarships offered by Sir Henry Thornton, President of the Canadian National Railway, have arrived in Canada. They are: Miss Joan Moore, Leicestershire; Miss Ivy Townsend, Surrey; Miss Mildred White, Devonshire; and Miss Emma Abbot, Lincolnshire.

These girls are experts in farming. They are being chaperoned by Miss Stella Wolfe Murray, a well-known English newspaper woman and a devotee of General Wolfe. The four farmettes will remain in Canada for about four months and during this time every opportunity will be given the girls to study Canadian agriculture under the most favorable conditions.

They will visit the various provinces. Invitations have been sent for Miss Moore and Miss Abbot to take a course at the Ontario Agricultural College, Guelph, while Miss Townsend and Miss White will attend the Manitoba Agricultural College at Winnipeg.

Proposed Sugar Factory for Raymond

It is reported that efforts are being made to interest American capital in a sugar factory to be established in Southern Alberta, probably at Raymond. A sugar company at Salt Lake City is said to be behind the project and will build a factory if a great number of tests with beets this year are satisfactory.

## That Goose and Its Golden Eggs

### Anant the Unprecedented Building Boom in the U.S.

Of course only a goose would lay golden eggs. And of course only a goose that would lay golden eggs would lay them under duress.

Yet even a goose that does lay golden eggs knows when it is being choked to death.

The greatest building boom in the history of the United States has begun in fifties out and in gradually tapering off.

Will those most interested—the producers of building material and the workmen who put buildings together—have the wisdom to see that it might be worth while to coddle the goose rather than to choke it?—Barfoo Express.

It Will Relieve a Cold—Colds are the commonest ailments of mankind and if neglected may lead to serious conditions. Dr. Thomas' Electric Oil will relieve the bronchial passages of inflammation, soothe the throat and will strengthen them against subsequent attack. And as it cures the inflammation it will usually stop the cough because it allays the irritation in the throat. Try it and prove it.

Advertising By Radio

Winnipeg Board of Trade Has Novel Plan to Spread Information

The radio is being used to advertise Western Canada. The Winnipeg Board of Trade recently launched an advertising scheme of 52 radio lectures from the Government Station at that point, each to be given by a different speaker. The scheme originated in the wide interest evoked in Winnipeg history and progress which has been increased substantially by the increasing use of the radio.

Micard's Liniment relieves Rheum, etc.

Sir John's Wisdom

Letters of Sir John Macdonald, edited by Joseph Pope, show that Sir John in the sixties, last century formulated a plan for the conservation of the forest wealth of Canada, and suggested stringent action to prevent forest fires. What a much richer heritage Canada and progress which has been increased substantially by the increasing use of the radio.

Tramp—Your dog just bit a piece of flesh out of my leg, man.

Woman—Glad you mentioned it. I was just going to feed him—Caboon.

Refreshes Weary Eyes

When Your Eyes feel Dull and Heavy, use MURINE. It refresh

## PRICE OF A HOME SPENT IN VAIN

Mrs. Logue States Money Failed to Buy Health, But Tanlac Restored It

"I bless the day I started on the Tanlac treatment, for it completely ended my troubles, which had kept me miserably ever since I came here from Scotland eleven years ago." Is the grateful statement of Mrs. Emily Logue, 129 N. Park St., Hamilton, Ontario.

"At times indigestion, gas bloating and heart palpitation tormented me till I thought I would drive me frantic. My appetite was so poor I scarcely ate enough to keep going, and I grew so weak and worn out I had to let my housework go. My head ached till I thought it would split. I had fearful dizzy spells, and couldn't get a good night's sleep."

"I spent enough money on medicine to buy a home, but nothing helped me until I started on Tanlac. I now have a perfect appetite, my digestion is splendid, and I always feel strong and well, for Tanlac has built me up to robust health, and I will always praise it."

Tanlac is for sale by all good druggists. Accept no substitute. Over 37 million bottles sold.

Tanlac Vegetable Pills are nature's own remedy for constipation. For sale everywhere.

## WORLD HAPPENINGS BRIEFLY TOLD

The National Cotton Spinning Association at Tokio has decided voluntarily to reduce the hours of female workers from 12 to 10 hours daily, effective in July.

Thirty-five thousand of the poorest Glasgow workers were given a dinner from the fund of £500 presented for that purpose by the Duke of York in celebration of his wedding day.

Sheriff J. D. Tweed, of Orange County, N.Y., has appointed four women as deputy sheriffs, and applied them with badges. One of the women is his wife.

After 30 years on the staff of Trinity College, Toronto, in the department of Greek, Professor Adam Carruthers is retiring. He graduated from the college in 1889.

Caught in a small on Lake Deslaur, near Erickdale, Man., about 50 miles north of Winnipeg, Walter Greenwood, 12, was drowned when his small boat capsized.

The Azores Islands are threatened with famine due to failure of the Tidewater Trading Company to deliver 150,000 worth of corn, according to the Portuguese Consul-General.

No fewer than 42,777 people died from consumption in England and Wales last year. This is an average of 117 a day. The above figures were disclosed by Mr. Neville Chamberlain in the British House of Commons.

George H. Middleton died recently at his home in Vancouver. He came to Canada from England in 1892, and during the second Irish rebellion did special transport work with General Middleton. He was in his 79th year.

Diamond merchants of Antwerp will hold a festival of precious stones in August. Charities covered with rich Oriental rugs encrusted with diamonds, rubies, emeralds and sapphires will figure in a procession, and 3,000 diamond merchants will follow.

MRS. A. A. FOULGER

This Nurse Sends a Message to Every Woman in Canada

Brantford, Ont. "During twenty-one years of experience at nursing, I not only took Dr. Pierce's Female Purifier, but I have also recommended it to many a patient, especially to prospective mothers, and think it by far the best tonic and restorative that a woman can take, and for that reason I give it my highest endorsement." Mrs. A. A. Foulger, 41 Sheridan Street.

Health is most important to every woman. You cannot afford to neglect it when your neighborhood druggists can supply you with Favorite Prescription, in tablet or liquid. This prescription is made in Dr. Pierce's Laboratory in Philadelphia, Pa. Be sure there is a woman's name on the bottle.

W. N. U. 1473

## Curious Laws

Laws in Great Britain Were Very Exacting in Days Of Long Ago

Funny laws have been tried out sometimes. In Edward III's time a law was passed which forbade more than two corpses being served at dinner, except on certain specified holidays. It sounds like the various laws against treating and other food regulations. "To do, or exercise, any worldly labor, business, or work on your ordinary calling on Sunday" is another little misdemeanor for which in the old days people were fined five shillings or put in the stocks for two hours. Other things still punishable by law are sitting next to a Wednesday and driving on a Sunday. In short time ago a man was summoned for selling lavender without a pedlar's license. Apparently he sold the lavender doing up in bags, for had he sold it loose he would not have been judged worthy of a pedlar. The summons was dismissed.

## First Woman Graduate

Miss Maryatt Receives Degree in Agriculture From Alberta College

The first woman graduate in agriculture from the University of Alberta was Miss Sheila Maryatt, sister of Hon. Mrs. Paribny, Minister without Portfolio in the Alberta Government, and lives at Alis, Alberta. For two years Miss Maryatt was a student at Oils Agricultural School, and previously had taken a short course at Guelph. She has just completed a three-year course at Alberta University.

## Girls! Women!

Improve Your Looks!

HOW TO MAKE THE GLOW OF HEALTH SHINE IN YOUR CHEEKS

News of a Simple Treatment That Thousands Find Beneficial

Alas—your bloodless face indicates trouble. Your water, about 50 miles north of Winnipeg, Walter Greenwood, 12, was drowned when his small boat capsized.

The Azores Islands are threatened with famine due to failure of the Tidewater Trading Company to deliver 150,000 worth of corn, according to the Portuguese Consul-General.

No fewer than 42,777 people died from consumption in England and Wales last year. This is an average of 117 a day. The above figures were disclosed by Mr. Neville Chamberlain in the British House of Commons.

## NOSE COLDS QUICKLY STOPPED

A neglected cold is the open gateway to Consumption.

To quickly stop a cold, the best way is to clear the air passages of the nose and throat; free them of germs, and get the healing power of CATARRHOZINE to the rest.

One breath of CATARRHOZINE brings instant relief. Your suffering stops. Hoarseness is relieved, throat and nose are cleared, inflamed bronchial tubes are healed, all danger of Catarrh is prevented.

Remove the seeds from fresh, clean dates; stuff some of them with pieces of marshmallow, others with Sea-Maid seeded raisins, candied cherries and walnuts. Melt sweet chocolate and into this dip the prepared dates.

Harvey Cranberry Pudding

1 cup cranberries, 1/4 cups flour.

2 tablespoons shortening, 1 cup sugar.

2 teaspoons baking powder, 1/2 cup water.

2 tablespoons water, 1/2 cup Sun-Maid seeded raisins.

1/4 teaspoon salt.

Mix flour, baking powder and salt, rub in shortening and mix with 1/4 cup cold water. Roll out on a floured board to 1/4 inch thickness.

Wash cranberries and raisins. Boil sugar and 2 tablespoons water two minutes. Let cool. Put in centre of paste, bring up corners, lay over to keep juice from coming out. Put pudding in a well buttered bowl. Tie in a cloth, leaving plenty of room to swell. Place in a pot of boiling water, having enough water to cover. Boil 40 minutes. Serve hot with hard sauce.

Wash cranberries and raisins. Boil sugar and 2 tablespoons water two minutes. Let cool. Put in centre of paste, bring up corners, lay over to keep juice from coming out. ## Older Than King Tut

Cypress Tree That Has Attained to a Remarkable Age

Louisiana has an immense cypress tree which contains about 35,000 feet of lumber, it belongs to William Edmonson who will not have it felled. Scientists say that this tree is 2,500 years old. It was alive when Jerusalem was entered by Nebuchadnezzar; was 600 years old at the birth of Christ and more than 2,000 years old when Columbus discovered America. Other wonderful trees of immense age are the Baobab tree in Senegal, which is 4,000 years old; the redwood tree in California, and a Dragon tree in Teneriffe about the same age; and a cypress in Mexico which is supposed to have reached the remarkable age of 6,000 years.

Even if a man doesn't attempt to flirt with a pretty girl on a street car she suspects that he'd like to.

## His Flesh Horribly Burnt

His druggist sold him a cheap Cad remedy, instead of giving him good old reliable Putnam's Corn Excelsior which has been for fifty years the standard remedy of corns and warts. "Putnam's" never fails, it is the healing power of CATARRHOZINE to the rest.

## CIRCLE TOURS OF UNRIVALLED SPLENDOR

ENDLESS SCENIC PANORAMA AWAITING TOURISTS OVER C.P.R. LINES

Picture the quiet beauty of England's Lakeland, the grandeur of the Adirondacks and the towering splendor of Swiss mountains and you will be able to form some idea of the endless scenic panoramas which await the vacationists taking THE CIRCLE TOURS OF THE CANADIAN PACIFIC.

These delightful tours may be made through Calgary, entering the Rockies at the Gap, through beautiful Banff, lovely Lake Louise and Glacier, leaving the main line for a cruise down the Arrow Lakes, Kootenay Lake and back via The Crow's Nest Line. The second tour takes the same route, but extends further through Sicamous and down the picturesque Okanagan Lake to Penticton, returning through the Crow's Nest Line. (Both tours apply in the reverse direction if desired).

Wonderful tours are moderately priced, and offer the best as a princely feast of scenic beauty of mountain, lake and woodland) unrivalled comfort of travel. From the moment of starting until the hour of excursion fares for these tours are on sale daily to September 30th, allowing stopovers at any of the delightful resorts. The return limit is October 31st.

Fervish, pale, restless and sickly children are their condition to worms. Mother Graves' Worm Expeller will relieve them and restore health.

## Forty Millions in a Spoon

Forty Million Living Organisms in a Gramme of Soil

Soil is usually considered lifeless, but Sir John Russell has taken a census, and finds that in a single gramme of soil, about enough to fill a teaspoon, there are more than forty million organisms.

John Stovel, aged 65, head of the Stovel Printing & Lithographing Co., Winnipeg, died at Rochester on May 30th, following an operation. Mr. Stovel represented Winnipeg in the Manitoba legislature during 1921-22 as a Liberal.

Homer P. Keith, district roads engineer, came to The Pass on Monday and has been busy stringing up the amount of damage done by the recent floods. It is expected that work will start immediately, grading and ballasting the roads through the district.

Rumor has it that a young man of twenty years lost his life in the North Fork last week end.

The high water on Saturday reached the fourth floor of Vanheltin's residence at Riverview. Several framed birth certificates were submerged.

A contract has been entered into by the Labrador Gold Fields, Limited, with W. M. McDonald, of Sydney, for the transportation of 5000 men and 100,000 tons of freight from that port to the gold fields.

## ESTATE MAY AGAIN BE CAUSE OF LEGAL ACTION

TORONTO, May 31.—In the death on Tuesday of Mrs. Sophia Lee McLaren, widow of the late Senator Peter McLaren, of Perth, the division of her late husband's estate estimated at more than \$15,000,000 may again be the basis of legal proceedings. The bulk of the McLaren estate is located in Virginia and includes approximately 87,000 acres of mining property. Following the death of the senator in 1919, the question of the administration of the estate was fought out in the courts.

J. P. McLaren, a son, George Ritchie, K. C., of Toronto, and the widow were named by the will as executors, but much litigation has since taken place.

The late Sen. Peter McLaren was at one time owner of the McLaren timber limits in this district.

## THE CROW'S NEST ROUTE

The Lethbridge Herald calls attention to a recent article in which the prospect for the shipment of wheat to Vancouver via the Crow's Nest Pass branch of the Canadian Pacific Railway is discussed.

It is pointed out that, though the distance is 40 miles greater via the Crow's Nest Pass than via the Kicking Horse Pass, the gradients are considerably less on the southern route. The high point of altitude is at Crow's Nest, where an altitude of 4141 feet is reached. On the main line the high point is at Stephen, near Eldon, where the altitude is 4213 feet.

The possibilities of developing the southern route are therefore apparent and the Lethbridge Board of Trade and Southern Alberta farmers' organizations should keep hammering away for action.

It is pointed out that, in connection with the development of a southern route wheat traffic to the Pacific, an interior elevator is badly needed. Such an elevator is needed in any event, whether the wheat goes east or west, but it is an absolute necessity before the Crow route to the coast can come into its own.

Lethbridge stands to benefit greatly by the routing of wheat through the southern pass of the Rockies.

## WOMEN CRIMINALS

But the madness of the woman criminal is not, as I see it, a madness over which one ought to sentimentalize, because the more one sentimentalizes over madness, the more one stimulates it in those who are already approaching its border-line. To punish women criminals more lightly than men criminals is, I think, merely to encourage other women to crime. Woman is no longer a caged animal. She is, with some very few exceptions, legally free, a citizen as a man is a citizen, possessing equal rights and equal remedies under the law. Therefore she must learn to utilize those rights, those remedies, and not to take the law into her own hands. She must learn that she cannot, once more, to use that homely simile, eat her cake and have it; that the law is her protection as much as a man's, and that if she infringes it, she, like a man, must pay the penalty.

This, I know, sounds a harsh doctrine, but like many harsh doctrines, it is, in the long run, the kindest to the race. Lawless mothers breed lawless sons and lawless sons, in turn, breed lawless mothers. In April "Forum."

## THE PASS FIFTEEN YEARS AGO

(Frank Paper, 1908.)

October 29—A sad accident occurred in the mine of the West Canadian Collieries at Bellevue on Saturday morning last, costing the life of Rosa Marquardt, one of the best known and most popular among the foreign-born miners of the district. He was caught by a fall of coal and almost instantly killed.

Monday's election resulted in an overwhelming victory for the government of Sir Wilfrid Laurier. Mr. McDonald, the Pass Liberal standard bearer, had a majority in this district of 66 over Mr. Herron, but was defeated by the Socialist candidate, Mr. Harrington. Ontario carried almost an even split, with 40 Liberals and 30 Conservatives returned and six constituencies in doubt, Quebec, Saskatchewan and New Brunswick were almost solid Liberal.

Bert Hargreaves and S. J. Watson visited Lethbridge this week.

E. Heathcote, district coal mine inspector, was in the district this week to investigate the accident at Bellevue mine.

The business of the government's long distance telephone service has increased to such an extent that it has become necessary to string another wire between Calgary and Macleod.

The West Canadian Collieries suffered some damage at their Life plant on Monday, when a governor belt came off in the absence of the engineer, with the result that the trolley engine ran away and was badly broken up.

A reward of two dollars is offered by A. Wardman, of Gillingham, for information that would lead to the conviction of the person who maltreated his mare by sitting the hindquarters with a knife or some other sharp instrument.

Corporal Askey's period of service in the mounted police expires next Tuesday. He has applied for re-enlistment.

What is felt by old timers to be the first storm of winter set in on Tuesday and there is now six or eight inches of snow on the ground.

The dedication of the new institutional church at Bellevue takes place on Sunday next. Rev. Buchanan will officiate at the dedication service. W. P. Williams will preside at the social to be held on Monday night.

November—A dastardly crime was committed at Coleman on Saturday, in which Mrs. Legal was the victim. The police arrested a suspect at Fernie, giving the name of Thomas Bennett. Bennett was released at Coleman when Mrs. Legal declared he was not the man.

Dave Ross has started in to build up the town of Monarch. Dave was our first druggist and since leaving Frank started in to build up Claresholm. The town of Monarch is handsomely laid out, with a public square, large lots and most admirable location. Bob Fisher, who was in partnership with Ross, is with him at Monarch. He also is reported prospering.

Boys playing about trains was the cause of a shocking accident at Coleman, which cost the life of John Miller, fifteen-year-old son of Mrs. David Pritchard. The lad worked for William Evans.

## OVER FIFTY CARS SOLD

We are informed by the manager of the Crow's Nest Pass Motors, Blairmore, that up to the present this season's sales of new cars amounts to about fifty, comprising thirteen Studebakers and about 33 Chevrolets. A car of "Chevy" was unloaded here about ten days ago and are now in the showrooms.

Oddfellows in the United States and Canada spent almost three quarters of a million dollars per month in routine relief work.

President Warren G. Harding, of the United States, has accepted the invitation of Vancouver and Victoria to visit them in July when he journeys northward to Alaska.

## Labor Reductions On Automobile Repairs

We are now operating our repair shop on the Flat Rate Plan. By this plan the automobile owner knows what the job is going to cost before the work is commenced. The following are a few prices on Chevrolet repairs:

Overhaul Motor	\$23.00
Overhaul Rear Axle and Propeller Shaft	\$2.25
Overhaul Transmission and Universal	\$2.25
Grind Valves and Clean Carbon	\$3.50
Rebuild Steering Knuckles and Plain Arms	\$4.50
Refine and Adjust Brakes (per set)	\$3.00
Tighten Main and Connecting Rod Bearings	\$7.75
Clean Carburetor	\$1.00
Retime Ignition	75c

FIRST CLASS MECHANICS — ALL WORK GUARANTEED

## Montreal Honors First Skipper in Port

1. C.P.S.S. Montrose bringing first passengers to Montreal, 1923 season. 2. Captain Edmund Aikman, Commander of the Bolingbroke.

TWENTY years ago Montreal was but a "mere calling place for ships." It had practically no modern cargo-handling devices or equipment, its wharf sheds were just wooden shacks which were actually taken down in winter to prevent them being blown away, and much of the merchandise was stored in the open air at the mercy of the wind and weather. Now Montreal is the greatest port of Canada and it is the best located. From a mere riverside stopping place for ships, it has stepped into the front rank of ocean ports, and has become equipped with facilities for the accommodation of ships and for the handling and storing of freight that are unrivaled on the continent. Despite the fact that Canada has less than 10,000,000 population and that the United States has more than 110,000,000, Montreal now handles a greater volume of business than any port on the American continent with the solitary exception of New York.

The principal reasons for Montreal's supremacy are the facts that it is nearly one thousand miles inland from the ocean, at the head of deep water navigation with direct access to the Atlantic, and that behind it is

a through route right up to the head of the Lakes at the Twin Cities, a thousand miles further inland. Were it an all-year port, Montreal would be the chief one of the continent; but for some months winter closes the beautiful St. Lawrence route, and the vessels waiting at the mouth of the great river must wait until the ice goes out in the spring before they can make their way westward.

About fifty years ago, the Harbor Master originated the idea of presenting a tall ship to the captain of the first vessel to arrive in the spring with a transatlantic ship. This custom was observed for about thirty-five years, then, as the top hats lost their popularity, a gold-headed cane was presented instead by the Harbor Commission.

This year the cane was presented to Captain Edmund Aikman, of the Canadian Pacific S.S. Bolingbroke who had just completed his first voyage in command. The Bolingbroke left London for Montreal on April 26, calling at Antwerp en route, arriving three hours ahead of her nearest competitor on May 2nd. The "Montrose" of the same line, the first passenger vessel to reach the port in 1923, arrived two days after.

## LIQUOR LEADS IN

## U. S. ENTERPRISES.

LONDON, May 11.—Half the miseries of the western world are caused by women fighting against men, declared Dr. Josiah Oldfield, eminent British physician, lawyer and author, in a recent London address. In spite of countless ages of experience, the doctor added, women had failed to excel even in cooking, yet they set up as competitors of men in all walks of life.

"Women," continued Dr. Oldfield, "have been tinklers on the mandolin and piano all through the ages, but it is among the men the creative musicians are found."

In the sphere of art, also, Dr. Oldfield said that although women had been busy painting their lips and faces, their nails and eyelashes for countless ages, if one sought paintings which would create emotions of the highest and best character for all time, one has to go to paintings done by men.

"Women are imitative and not creative," said the English critic, "if search is made in Westminster abbey for records of the great women of England, one will find a few actresses and courtesans but none who were worthy of being commemorated as poets, painters, sculptors, inventors, world planners or world benefactors." Having charged women with neglecting the most sacred duties of motherhood and with having selected the doubtful pleasure of politics and public life in place of it, Dr. Oldfield concluded by saying that men were superior and should be revered and until women were taught to become affectionate junior comrades in the co-partnership of the sexes, there would be no peace in life.

Vancouver's tax arrears amount to slightly over \$3,420,000. Blairmore's arrears are somewhat less.

Accidentally going off in the kitchen of the farm house, a shot from a 22-caliber rifle in the hands of twelve-year-old Emmanuel Klager killed his mother, aged 59, at Danmore on Saturday morning. The boy had been out shooting gophers and returning carried the gun into the kitchen with him.

Macloed is to have a new industry in the form of a creosote dipping plant.

CHICAGO, May 28.—Some statisticians assert that the steel industry or the automobile industry are the largest enterprises in the United States, but investigators who are rounding up their figures say the greatest single business in the United States today, legitimate or otherwise, is liquor. In the number of men engaged and the daily amount of turnover in cash, it stands at the top of all American industries.

Smugglers in the shacks of Ecorse, Michigan, one of the wettest distributing points on the Canadian border, estimate that they and their helpers bring into the United States an average of 100,000 gallons a day—and they admit it is awful stuff.

Investigation shows that more than 25,000 persons are actively engaged in booze smuggling along the border and at various points in the United States. There are quick fortunes in the game. One smuggler, who, before prohibition days was glad to earn \$30 a week, admits he has made a fortune in three years and is quitting the game.

Passage of the prohibition law in the United States found a highly organized gang of smugglers, located all along the Canadian border, ready to get into the new game. Up to that time they had been engaged in smuggling Chinese across the border at from \$500 to \$1,000 each. They also engaged in other smuggling endeavors—handing jewels, cloth and other articles that were slipped in without paying duty.

But when prohibition came in they dropped everything else and concentrated upon this immensely profitable business.

Boxer Fined—Charlie "Rough-house" Burns, former lightweight champion of Canada, was fined \$20 and bound to keep the peace for a year by Magistrate Findlay in the police court yesterday on a charge of striking his wife when he returned from an absence of several months and said he found another man in the house—Vancouver Sun.

A. M. Peters, for some years manager of the Bank of Montreal, Calgary, and but recently elevated to the superintendency of western branches of the bank, is being transferred to the management at St. John, N. B.

## LEO ROGERS' CRIME CAREER

Following in the career of crime of Leo Rogers, the man-hunter, who was brought down at North Bay last week:

1916—Sentenced to serve a seven-year term in Kingston penitentiary for shop-breaking offences which he committed after having left school and secured employment as a fireman on the T. and N.O. railway.

1920—Made murderous attack while in penitentiary upon Inspector Walter Duncan and escaped from custody for a brief period. Was recaptured and given 15-year term.

December, 1922—Was paroled by the Dominion parole board and returned to North Bay.

April 12, 1923—Was in Toronto and held up two gun shops, securing man, revolvers and a stock of ammunition.

April 17, 1923—Was arrested in North Bay on a charge of carrying concealed weapons dangerous to the public.

May 16, 1923—Held up the North Bay courtroom with a fake revolver, when brought in for his trial and effected a sensational escape.

May 17—Shot and killed Constable Frank Lefebvre and wounded Constable McGovern in a fight when he was cornered. Made good his escape.

May 30—Reappeared at his home at North Bay after having been in hiding for some days and shot and killed Provincial Police Sergeant J. Uguhart, successfully effecting his escape from the house.

May 30—Was trailed to woods and shot by provincial police guards.

## Here and There

48,000,000 bushels of grain await the opening of the season at Port William and Port Arthur this spring.

Flood conditions in New Brunswick and Maine this spring were the worst since 1887.

Damage to Canadian Pacific property in Western Canada by floods this spring amounted to approximately \$200,000.

Calgary is the leading telephone city in the continent, with one instrument to every 410 persons. The phones in this city are automatic.

The per capita debt of Canada is approximately \$165, as compared with \$250 for the United States, \$750 for Great Britain, \$800 for France and \$250 for Australia.

Canadian Pacific steamer "Marloch" and "Metamora" docked at St. John with over 500 Barbadian immigrants to Red River, Alberta, and various parts of Ontario.

The 1923 camp of the Alpina Club of Canada will be pitched in Larch Valley, near Mountain Lake, nine miles from Lake Umbagog in the Canadian Pacific Rockies.

Travelling 522 knots in twenty-four hours, an average of from 23 to 34 knots per hour, the Canadian Pacific liner "Empress of Canada" recently established a record for commercial vessels on the Pacific.

The last link in the great 6,500 mile scenic tour through Western Canada and the United States will be thrown open to traffic on June 30th when the Banff-Windermere Motor Highway will be officially opened.

A cat of timothy and grass seed arrived Vancouver via Canada Pacific Railway from Toronto ten days after an order had been wired to the Ontario Capital. This constitutes a record in service.

In architectural style the new Basilica at St. Anne de Beaupre will be a combination of the Roman and the Gothic. The steeple in front will be 225 feet high and including those in the chapels the new Basilica will contain twenty-six altars.

The honor of bringing the first ship to the port of Montreal from the ocean fell this year to Captain Edmund Aikman, commander of the Canadian Pacific steamer "Bolingbroke," a freighter. The "Montrose" of the same line was the first vessel to carry trans-Atlantic passengers into the port in 1923.

The number of strikes and lock-outs in Canada during 1927 was 85. The number of working men involved in the strikes was 41,566 and the number of working days lost 1,975,378. Approximately fifty per cent of the time lost was in connection with the coal, oil and gas miners in Alberta and British Columbia which lasted from April till the end of August.

Topping the grain shipments from St. John in 1927 was the winter season by a most four million bushels and establishing a record for the port for volume in a single shipment. The single shipment of grain for one vessel, the 1927-28 grain business through the Canadian Pacific, was valued at \$1,154,249.31 bushels. The single shipper's record was made on an all-wheat cargo of 339,739 bushels.

## "PULL DOWN YOUR VEST"

Gradually during the past week a slang phrase and a story of the days of our childhood have been revived by the incidents of spring. In those days, when a man talked idly, with a strut or a pompous bearing, the call was "pull down your vest." This was a slang phrase, whose origin could be easily traced. The story is about a Chinaman who was travelling across Canada in the winter at a time when it was quite the thing for Chinamen to wear smock shirts. The hero of this tale was walking up and down the aisle of the car, rubbing his hands together and, saying, "helle cole, helle cole" when an old Scotch lady in one of the seats said to him in a stage whisper "put your shirt in your vest and your body will be warm enough."

The story was told by a Presbyterian minister at a Sunday school picnic, and therefore must be wholesome and reliable. It is the shortest vest that the young men wear with an inch or two of shirt exposed that calls back these little frivolities of the past. In spite of the frivolities the young men are nice.

## DOUKHOBORS TO

## BURN SCHOOLS

NELSON, B. C., May 31.—W. L. Verigin, nephew of Peter Verigin, writing to Hon. J. D. McLean, minister of education, protesting against summoning of Glado Doukhobors for not sending their children to school, in these place says:

"If the police at Nelson will compel us to take the fine then all the schools in the Doukhobor colonies shall be closed, and I cannot guarantee that the schools will not be burned, because it is evident that the government is looking for a reason to pick a quarrel with the Doukhobors regarding school questions."

## CONTRARY-MINDED

It is a serious disavowal to anyone to acquire a reputation for being contrary-minded. Few persons who are unpopular really glory in their unpopularity, even though some of them make a pretence of doing so. And the contrary-minded person speedily becomes unpopular, often to his astonishment and dismay. He does not understand why the faithful performance of his function in life, which is to save people from committing mistakes, should react so unfavorably on his own welfare.

Usually it isn't so much the contrary-minded person's contrariness that people object to as his manner of showing it. Criticism that may be almost wholly destructive may be presented in such a way as to be acceptable—first, if it is asked for, not officiously volunteered, and next if it is expressed in considerate and not in disparaging or sneering or exultant terms. There seems to be something in the temperament of the contrary-minded person that makes it difficult for him to be tactful in his treatment of the issues that he is constantly encountering. He takes up each one in a spirit of intolerance that is provocative of trouble with those on the other side. This skinned himself, he fails to realize that people who don't agree with him may also be sensitive. To have regard for other people's feelings even while pointing out the erroneous workings of their minds should be a guiding principle of those who are contrary-minded. If they would follow it, they would bring other persons round to their way of thinking more often than they do. And sometimes that would be desirable, for events do sometimes prove that the contrary-minded were right.

—Exchange.

Rev. Father Michael Esper, pastor of St. Boniface Catholic church, Detroit, shot and slightly wounded a fourteen-year-old boy after he had been caught in the act of robbing pool boxes in the church.

Monday was observed as a holiday by the schools and other public institutions, in celebration of the King's birthday.

## PREVENTING EXPORT OF

## LIQUOR FROM GOVERNMENT

## CONTROLLED PROVINCES

The provinces of Quebec and British Columbia, the two Canadian provinces whose government control of liquor is in force, are behind an amendment introduced into the senate asking that the statute be changed to prevent the private importation of liquor into government controlled provinces, giving them the same powers to prevent importations of liquor into the provinces as Ontario and other prohibition provinces have by virtue of being a prohibition province.

The legislation is introduced at the request of two provinces on account of the utter impossibility of giving decent enforcement so long as private importation continues. It will prevent export from Quebec and British Columbia to other Canadian provinces.

The Attorney-General of Alberta is in Ottawa and strongly supports the measure.

George R. Westland, founder of and for many years editor and proprietor of the *Insular Province*, has once more entered into the newspaper game, having taken over the *Express* at Beauville, Ontario. Prior to his coming to Alberta, Mr. Westland served with the *Glencoe Transcript* and *London Advertiser*.

## Here and There

Panama canal tolls for April amounted to \$1,578,987.

About \$2,300,000 is to be spent on the construction of roads and bridges in the province of British Columbia this year.

The Customs and Excise revenue for April amounted to \$20,500,000, an increase of \$9,000,000 over the revenue for April of last year.

Emigrants numbering 15,000 left Seattle for Canada during the last four months of the year, according to consular estimates in Glasgow.

Canadian flour has at last been placed on the Panama market. One Seattle flour mill has been given permission of any size, 1,000 barrels being taken.

Seventy-five per cent of the copper produced in Canada in 1927 was the output of British Columbia mines. The Canadian production for the year was \$2,351,402 pounds of the metal. The output of the United States for 1927 was \$2,352,521 pounds.

The famous Chateau Frontenac husky dog team, which has been visited by visitors during last winter's sports season, is being perpetuated. One of the dogs has just given birth to three pups, and if the youngsters turn out to be like their parents the Chateau Frontenac team is likely to continue winning dog derbies.

Fishing licenses for the Maritime Provinces have been reduced. The special fishery regulations for Nova Scotia, New Brunswick and Prince Edward Island have been amended to provide that in many instances where the license has been more than a dollar, it will now be one dollar.

No limit will be set to the help to be offered to new settlers in the agricultural sections of the province of Quebec, according to Premier Taschereau. The latest government provision to pay colonists at the rate of \$4.00 per acre for land cleared on their colonization lots since 1920, \$7,000,000 have been voted for providing colonization.

The decision of the Canadian Pacific Railway Company to scrap agreements of sale with 50,000 Canadian farmers in the west and enter into new contracts with them, extending over 34 years on an amortization basis, will affect agreements of a value of approximately \$100,000,000, and relieve many farmers of heavy, pressing debts.

The new motor ferry operated between Victoria, B.C., and Ballinghams, Wash., is capable of a speed of 14 knots in adverse weather. This motor-driven vessel recently launched, the first of its class to be used in this service, is the first to be added to the Canadian Pacific fleet. It has a capacity for 50 automobiles.

Abraham Martin, first Scotch settler in Canada, first Elder of the St. Lawrence and first farmer on the Plains of Abraham, which were named after him, had been honored by the Canadian Pacific Steamships, Ltd., at Quebec by the erection of a granite obelisk. Hon. Athanasius David, Provincial Treasurer of Quebec, officiated at the unveiling ceremony recently.

Two thousand Canadian Red Men are expected to meet at the Calgary stampede and to move on to Banff for their celebrations and sport for volume in a whole shipment. The single shipment of grain for one vessel, the 1927-28 grain business through the Canadian Pacific, was valued at \$1,154,249.31 bushels. The single shipper's record was made on an all-wheat cargo of 339,739 bushels.

## Legislating People Into Heaven

Wise Legislation, Properly Administered Can Accomplish Much Good  
(Dr. T. G. Sharer)

The man on the street and occasionally in Parliament meeting assert: "You cannot legislate people into heaven." Recently a clergyman has raised the question whether it is wise to attempt to establish the Kingdom of God by legislation? That is a better way of putting the question, and when so put by such an individual deserves a serious answer.

And our first word in answer must be that we know of no person or group in Canada that proposes to "establish the Kingdom of God by legislation." Our second must be that in our opinion without question "it is not possible to establish the Kingdom of God by legislation," and hence that no wise man will try that impossible thing.

But there are things that can be done by legislation that have a most significant bearing on the establishment of the Kingdom of God in this world.

First, negatively, much that hinders the Kingdom of God and prevents many from entering that Kingdom can and ought by Act of Parliament to be forbidden and suppressed, for instance, the illicit traffic in habit-forming drugs such as opium, morphine and cocaine. That traffic, cutting down thousands of Canadians, mostly young (fifteen and twenty-five years of age) year by year. It is estimated by the Federal Department of Health that there are at present more than 2,000 persons addicted to (which means enslaved by) these drugs, and hundreds of unscrupulous, villainous, largely Chinese, are engaged in the business of enslaving them "for the money there is in it by month for the most part present passing a new, improved, consolidated law with very heavy penalties, and appropriating large sums of money for its enforcement, for the purpose of suppressing this baneful business that rapidly ruins the health, the life, and the morals of its many victims, or, in the words of the removing of a great hindrance to the establishment of the Kingdom of God. Isn't this wise?"

The same principle applies to other baneful traffics in human vice, such as the traffic in girls for immoral purposes, the traffic in obscene books and pictures, salacious plays, etc., these can only be suppressed by wise legislation, worthily enforced. Not many will question the wisdom of legislation of this kind.

Second, positively, there are many classes of its citizens that the nation cannot save from crime and ruin without legislation as for instance underprivileged and handicapped children, dependent, neglected, delinquent, physically and mentally defective, and the children born out of wedlock. To illustrate from the first named class, namely, dependent children. Many thousands of mothers are left virtually entirely without income, and with the care of a number of little children on their hands. In the past they have had but two alternatives, the accepting of charity, or endeavoring to perform the function of both breadwinner and mother, and very few women are able to carry this "double load" without breaking in health, or in mind, or in morals. Society has found a better way in the Mothers' Allowance laws, in terms of which the provinces provide, monthly, by law, for the necessities of life for such mothers and their little families. At the time of writing in the province of Ontario and the west, there are 6,500 such mothers with 22,000 children in the aggregate in their families, provided for at the cost to these five provinces of \$3,000,000 per year. It is not difficult to imagine the great number of domestic tragedies thus averted, and the number of children that "might be" the next victims of the same.

No you cannot legislate people into heaven, but the Kingdom of God can be largely overthrown, and even numbers of the victims of vice, crime, disease and injustice can be delivered by wise legislation, worthily administered, and confidence can be prevented from being vitiated.

There was once a state in the United States called Franklin. It passed out of existence in 1786.

An ounce of honest criticism is worth more than a pound of flattery.

W. N. U. 1474

## Peculiar Methods Of Birds

Late W. H. Hudson gave Descriptions Of Their Behavior

Animals have peculiar forms of courtship. The late W. H. Hudson gave some striking descriptions of the behavior of the South American cock-crow, mentioning instances of where one suitor after another shows off in the midst of a gallery of spectators.

A clear arena is chosen, and the candidates, with orange scarlet crest and plumage, dance a minuet, spreading his wings and tail with all the superb pomp of a southern negro court-dancing with his fiancée. He leaps and grates in the most astonishing manner, until becoming exhausted, he retires and another bird takes his place.

There is a social and competitive aspect to such forms of courtship, which in this case strikes a somewhat note, resembling as it does certain native dances in which only one person performs at a time.

In his "Naturalist in La Plata," Mr. Hudson gave a number of examples of dancing among birds. His interpretation differed somewhat from Darwin's, for he felt bound to conclude that in many cases the dance was not the cock's competitive display of good points, nor his endeavor to excite and rivet the hen bird's attention, but that it was rather an expression of joy and exuberant vigor.

This he tells of the singularly waited, wing spurred, long-toed juncos, that a flock of them will suddenly, in response to a note of invitation, leave off feeding and fly to one spot, where they form a close cluster and indulge in a strange exhibition, both of males and females taking part. They "spread out their wings like beautiful flags grouped closely together; some hold the wings up vertically and motionless; others, half open and vibrating rapidly; while others wave them up and down with a slow, measured beat."

## New Story About

Prince of Wales

Famous Singer Tells of His Early Ambitions

Some people may not have heard that Madame Marie Jerita, the brilliant, new Metropolitan soprano, is the wife of Baron Popper, a son of the famous Madame Blanche Marchesi, the well known singing teacher, and daughter of the "great" Marchesi, who in her day turned out most of the famous voices on the European operatic stage. She has just published a book, "Singer's Pilgrimage," and its pages are filled with interesting reminiscences and anecdotes.

She recalls a delightful story about the present Prince of Wales. He was asked: "What will you do when you are King?" and he answered—quite a little mite he was—"When I am King there will be in my country no sin, no bearing reins for horses, and no puppies' tails cut."

## Use For Old Horses

Metal Tempered to Right Hardness for Cutlery Steel

At Townbridge, England, may be seen an immense pile of old horses, down which have been collected, in small consignments from various blacksmiths. They weigh in the neighborhood of 120 tons and sometimes the pile even exceeds this amount. These old horses are particularly suited for melting down for cutlery steel, the metal having been tempered to just the right hardness by the beat of the horses' hoofs and wear and tear of the roads.—From the Wide World Magazine.

## Hedgehogs Provide Walking Sticks

Fifty per cent. of our walking sticks come from English hedgehogs. Particularly in Herefordshire and Worcestershire there are miles of hedges which are allowed to grow so tall that the magpies build in them. The magpie who supplies sticks in the rough pays the farmer a mutually agreed upon sum per hundred for the privilege of cutting them, and these, roughly trimmed and still green, he sells to the magpie-builders in the town.—From the London Daily Mail.

## Roller Bearings For Trains

Successful roller bearings for trains, for a long time a dream of engineers, seem to have now been produced in England. One man pushed with ease a 27-ton coach equipped with the new bearings, whereas it had taken seven men to push it without bearings. It is expected that the saving in fuel will be about 30 per cent.

How large the interest on a poultry note looks when you are paying it, and how small it looks when you are receiving it.

A pile of a billion dollars stacked one on top of another, would make a pile 248 miles high.

## Camp For Motorists

Banff-Windermere Motor Road Over the Central Rockies

Preparations for the opening ceremony of the Banff-Windermere motor road over the Central Rockies are being rapidly advanced and it is expected that the new motor camping ground near Banff as well as the other camp grounds along the road will be ready in good time for the opening on June 30. The Banff camp, situated near Mount Rundle, when completed, will be one of the best equipped in the Dominion. It will be lighted by electricity and water from the Banff system will be piped to the grounds.

Culinary, lavatory and telephone conveniences will be provided. A caretaker will be in charge throughout the season and the camp will be subject to inspection by the sanitary officer. In all there will be about 250 lots for campers.

## Buffalo For New Zealand

Bison From Walnwright Park to be Shipped to Antipodes

The city of Auckland, New Zealand, has set aside 170 acres of land for zoological gardens and the mayor of that city has written to the Canadian Government to ask for the gift of three buffaloes to add to the nucleus of a collection of wild animals of the world. Arrangements are being made for the transfer of three buffaloes, one male and two female, to the city of Auckland from Walnwright Park, Alberta, one of the Canadian Government National Parks, where the largest herd of buffalo in the world is.

## From Small Beginnings

Not all of the "poor but proud" youths who begin in the conventional way to make their fortunes meet a rich banker early in their career; but it does not matter if they make the most of their jobs. A woman who has sold newspapers all her life in New York died the other day and left an estate of \$30,000. By getting control of a chain of "shinies" she had made a million dollars.

Over a million people crossed over the lower steel arch bridge at Niagara Falls last year.

## The Two Horned Horribill

AM sure that when you see the picture of the Horribill bird, you will very quickly decide that they are quite the ugliest birds in the whole world. Maybe they are and maybe they are not, but of one thing I am sure which is that Mr. Horribill is a perfect dream of beauty and loveliness! He must for he is so devoted and attentive to her; which all goes to show how very much he loves her.

"Do you want to hear about them?" "Yes, please," said the little girl. "The Horribill family, such as the Rhinoceros Horribill of Malaya and some of the Indian Islands, and the Java Horribill, which is the one of whom I am now going to tell you."

I suppose you are curious to know in what way this Mr. Horribill shows his great affection for his long-beaked, scraggy haired mate. I know I was, and this is what I learned by patiently hiding and watching, off and on, a couple of these strange birds for a long while. With the greatest care as well as the greatest amount of discussion they choose a deep hole in a tree in which to start housekeeping. This home-hunting takes a great deal of time and gives them a lot of trouble, because they are almost five feet across the wing stretch. It is difficult to find a tree hole big enough to be comfortable. Like the small Woodpecker, they will not nest in any place but a hollow that suits them; they line the hole with soft little things that they have found. This done, Mr. Horribill, with a mixed feeling of joy and anxiety, goes down into it to lay her eggs. She lays four or five of them, and she is ever so proud and fond of them; for they are large and pure white.

All the time she is laying, Mr. Horribill is scouting the country for clay, which he wets with the juices from his mouth and carries home.

You can't imagine how tenderly he pats this against the breast of the nest I know, for I have seen him. Mr. Horribill uses his long wide bill in very much the same manner that a carpenter uses a trowel, while his wife helps him from the inside of the tree, until his clay is absolutely wallied in with clay. At least, all but her head and beak.

Then poor Mr. Horribill's real work begins. He flies all over the country in search of food for his mate, for he knows only too well that if he does not feed her she will starve in her prison-cell. She having nothing to think about except her food for three weeks (the time it takes the eggs to hatch), eats more than she ever before dreamed of eating! And poor Mr. Horribill is the one who has to feed her. He has to carry it to her and even feed it to her! No wonder that he becomes tired, thin and dispirited, while she becomes fat, lazy and as beautiful as it is possible for her to be!

I have heard that Mr. Horribill often works so devotedly on this duty that he almost wastes away and becomes far too thin. He gives his mate all the food and himself forgets about eating. He even softens it for her! He brings her sweet juicy fruit and nuts, biscuits and even mince and snakes, and she greedily swallows everything!

Naturally she grows so fat as to become thin, in fact, by the time the baby birds are hatched from the eggs she is so fat that she cannot hop out from her cramped nest.

There is only one thing to do, and unselfish Mr. Horribill does it. He uses all his strength and wits to break away the hardened clay that has covered up the opening to the nest, so as to allow Mrs. Horribill to come out and to show him his new family.

Some people say that this worked up with clay of their nest is for safety, but I don't think this theory correct; for snakes could wriggle and glide down the opening of the nest in spite of Mrs. Horribill's strong and protecting bill if they wished to. I think the reason is simply one of privacy and possession, which is very strong with most birds.

## New Decoration Scheme

Electric Company Pays Colored Lights May Displace Wallpaper

A method by which the mistress of the house may completely change the mural decorations of the entire domicile in less than five minutes is being devised in the Xela Park Research Laboratories of the General Electric Company at Cleveland.

The new device, operated entirely by electric lighting, is capable of throwing as many as fifty distinct wallpaper designs on the wall of the room in less than sixty seconds, with practically no human effort save the movement of a tilted glass on which are arranged various colored daubings.

The effect is obtained by the use of a specially made magic lantern box, which, when completed, may be concealed in the room and arranged so that the wall designs will be focused perfectly and changed at will. The colors, as well as the designs of the decorations, may be varied according to the effect desired. One may brighten the home to the stage of absolute gaiety through a play of brilliantly colored designs, or change to quiet and somber tones at will.

## Rather Inastable

Senator La Follette, at a dinner in St. John's, Newfoundland, when he was last in the city, said: "It reminds me of the farmer who came down to breakfast one morning in a Florida hotel."

"What yet got for breakfast, boy?" he said to the colored waiter genially. "Bread, fruit, ash," the waiter answered. "Cereals, briled bluefish, buckwheat cakes and sausage, liver and bacon, ham, steak, chops, fried chicken, doughnuts with melted maple sugar."

"Spit, boy, right," said the farmer, rubbing his hands. "Bring me all that, boy—and six nice tried eggs."

## Fish Lay Nine Million Eggs

One female fish may lay 2,000,000 eggs—this number was actually found in the roe of a turbot weighing seven-teen pounds.

## Some Geographical Facts

Strange How Little We Really Know About the Subject

Sir Bassett Digby, F.R.C.S., says it astonishes him to discover how many persons who claim to be well-educated can be so ignorant of the most elementary questions about geographical bearings. Sir Bassett continues:

Ask the next half-dozen doctors or literatures, divinity and medicine, judges, bishops, and professors whom you meet in London in what direction Edinburgh lies. It is a thousand pounds to a small potato that they will reply: "North or northeast, of course." Yet Edinburgh is 120 miles west of London, and actually due north of Cardiff.

Again, what is the most westerly point of Britain? Comes the answer: "Land's End, of course." Not a bit of it. Ardnamurchan Point, in Inverness, is ten miles further west, and there are several other points of the Scottish coast that are further west than the tip of Cornwall.

Who realizes that there are parts of the British Isles which are further north than Petrograd and parts of Greenland and Alaska? Yet that is true of the Shetland Isles. Moscow is south of Edinburgh. Liverpool is as far north as Labrador, Hudson's Bay, Alaska and Kamchatka.

Slipping your coffee at a Paris boulevard cafe, one balmy day in early spring, you shiver at the thought of living up there in the bleak north, at St. John's, Newfoundland, where icebergs are grinding about off the coast. Yet St. John's "up" there in the snows, is 100 miles south of Paris. As for that Canadian city, Montreal, where the ice palace is built every winter, where the mercury goes down, under zero, it is as far south as Venice, and 450 miles nearer the equator than London!

Again, the average man supposes that if he started to walk due north from London he would go on and on until he struck John O' Groats, or some other parts of the North Scottish coast. As a matter of fact he would strike blue water near Flamborough Head, in Yorkshire, and if he then turned on in a boat, due north, he would not go more than half an hour against the Polar ice.

And half the United States is south of some parts of India.

## How to Attain Success

Men Who Believe in Power of Attainment Seldom Fail

We are constantly denying ourselves of pleasures and benefits that really belong to us because we keep deluding ourselves with the belief that they are quite beyond our power of attainment. It is a little saying that we never know what we can do until we do it; but it is true, nevertheless, that success naturally gravitates to the man who braces his shoulders to meet it, and unsuspicious power flows to him who seems never to know when his own is exhausted.

Some wise man has remarked: "The only difference between the possible and the impossible is that the impossible requires a little more time and effort."

We must not get out hearts and brains and hands to the task before us, and get our souls so full of the possibilities that are rightfully ours that the irresistible momentum of faith, energy and enthusiasm will carry us plunging to the bottom of the sea.

## Increase in Trade

Export and Import Trade Between Canada and U.S. Shows Gains

In a recent official statement, trade between Canada and the United States both import and export, for the fiscal year ending March 31, 1923, show considerable increase over the preceding year. Total imports from the United States amounted, to \$150,917,492, of which \$322,262,722 was dutiable, and the remainder free of duty. For the year ending March 31, 1922, total imports amounted to \$155,955,196, including dutiable goods to the value of \$124,000,000.

Total exports to the United States from Canada during the twelve months were \$230,247,721, as compared with \$204,104,177 during the previous year. Of last year's exports the largest item was wood, wood products and paper, amounting to \$123,248,061. Animal products amounted to \$55,255,196, and agricultural products to \$1,193,572.

## Better Than Diving Rod

A supply of artesian water for an area of one million acres of arid country, southeast of Lethbridge, Alberta, was located by an officer of the Dominion Geological Survey recently, and the position of the water-bearing strata and its relation to Milk River was noted, wood products and paper, amounting to \$123,248,061. Animal products amounted to \$55,255,196, and agricultural products to \$1,193,572.

## Gold-Bearing Whiskers

Years ago, says the Scientific American, an Illinois barber, traded his razor for a pick and shovel and went to the Klondike. "Having failed to find gold there, he started a barber shop, the equipment of which included a cyanide tank. Clippings from the hair and beards of the miners were thrown into the tank for what they were worth." The barber then took the cyanide tank and sold it for a million dollars worth of gold with him—Yonita's Companion.

## Marketing Eggs By Dozens Or Pounds

Advantages of Selling by Weight Grow Out of Fall and Winter Prices

(By Seth W. Shoemaker, Director, School of Agricultural Extension, at Correspondence Schools, Scranton, Pa.)

The selling of eggs by weight is a matter which has been advocated by dealers and consumers in some of the larger cities for some time and is a practice that is quite generally followed in several European countries.

Discussion of this matter is often influenced by the price of eggs. When eggs are low priced, no one seems to bother about the weight, but when eggs are high priced as in the fall and winter, discussion of this matter is often revived.

When eggs are high priced it is not an injustice to both dealer and consumer when they are sold by the dozen. The producer who sells large eggs at the same price that the nearby producer gets for his smaller eggs is

not getting as much for his product because it is a well known fact that the hens laying larger eggs do not, as a rule, lay as many as those laying smaller eggs. Some breeders hatch chicks only from their producers of the largest and best eggs in order to produce a strain of fowls that will lay large eggs and get for them the highest price. It is not so for the "wise" except that perhaps their eggs may be a little more in demand by a local trade.

## By Dozen or by Pound

On the other hand, the consumer of eggs who will pay 50 cents for one dozen a dozen during the winter for eggs will find a great difference in the food value received for the money in eggs of different weight. On the basis of food value, some eggs at a dollar a dozen may be cheaper than others at 80 cents a dozen.

Perhaps the chief reason why eggs have almost always been sold by the dozen is because this seems to be the most handy method. Eggs must be carefully handled and cannot be thrown on the scales like potatoes, etc. Also if eggs were sold by the pound, hotel and restaurant keepers might show a preference for small eggs as these would give them more individual orders for their money.

To substantiate the statement that they should consider bantam fowls the most profitable breed if eggs were to be sold by the pound. The argument for this is that certain buyers like the hotel and restaurant trade would want eggs that made up the largest number in the pound.

As an argument against selling by the pound, many poultry producers argue that this would not make much difference because their pullet eggs are small and eggs from mature fowls are somewhat larger and are sold by selling larger eggs by the dozen is gained by selling the smaller ones by the dozen.

Best Weight is Two Ounces. Marketable eggs should weigh not less than two ounces each. At this rate, a crate of thirty dozen eggs will weigh forty-five pounds, exclusive of the crate. In markets where quality is carefully considered such eggs will be in better demand and will often sell for somewhat better prices than eggs of smaller size.

Eggs that are much larger than two ounces each are not profitable to sell, because they bring very little, if any, higher prices in the general market and do not pay many more. In special markets it is possible to get a premium on eggs that average about two and one-half ounces.

The weight of eggs depends to a large extent upon the breed of fowls that lay them and also on the peculiarities of individual fowls. The following, however, gives the average weight of fowls' eggs:

Eggs	Ounces
8 Hen's eggs average	16
11 Guinea eggs average	16
1 Duck egg	5
1 Turkey egg	4
1 Goose egg	6 or 7

## Gold-Bearing Whiskers

Years ago, says the Scientific American, an Illinois barber, traded his razor for a pick and shovel and went to the Klondike. "Having failed to find gold there, he started a barber shop, the equipment of which included a cyanide tank. Clippings from the hair and beards of the miners were thrown into the tank for what they were worth." The barber then took the cyanide tank and sold it for a million dollars worth of gold with him—Yonita's Companion.

Blairmore Lodge, No. 66, meets every Tuesday night at 8 p.m. in the Oddfellows' hall. Officers for the coming term: J. B. Harner, N.G.; M. H. Hufferman, V.G.; Fred Goulding, L.S.; H. C. James, F.S.; J. Montalbet, Treas.

Crow's Nest Encampment No. 8, meets on the second and fourth Wednesday of the month in the I.O.O.F. hall at 8 p.m. Officers for ensuing term: W. Patterson, C.P.; James Crowder, S.W.; R. Oliver, L.S. and F.S.; Jos. Montalbet, Treas.

Crowley Rebekah Lodge, No. 66, meets the first and third Thursday of the month at 8 p.m. Officers: Sister Arner, N.G.; Sister Evans, V.G.; Sister D. James, R. S.; Sister Hood, F.S.; Sister N. Evans, Treasurer.

Bellevue Lodge No. 115, meets every Monday night at 8 p.m. Officers: H. Harrison, N.G.; E. Fisher, V.G.; Jos. Shevels, Sec.; F. Padgett, Treas.

Armistice Encampment No. 7, Blairmore, meets the first and third Wednesday of the month. Officers: A. B. Carr, C.P.; Stephen Berry, H. P.; Harry Jensen, S.W.; Fred Padgett, L.W.; E. E. E. Coffin, Treasurer; Charles W. Ray, Scribe; Box 6.

Ray of Hope Rebekah Lodge No. 67, meets the first and third Wednesday of the month. Officers: Sister Dryden, N.G.; Sister Litherland, V.G.; Sister Beal, R.S.; Sister Christie, F.S.; Sister Patterson, Treasurer.

Visitors of the Order are cordially invited to attend the above lodges.

SUGGESTED BY THE

COAL SHORTAGE

Before beginning her story to the

children the lady announced that if

there was anything in the reading

they did not understand they should

raise their hands. In a few minutes,

says the Boston Transcript, she came

to the passage: "And every morning

the prince would mount his beautiful

white horse and canoodle along the

streets."

A little hand shot up.

"Well, dear,"

"Please, m'am, wouldn't it have

been better for the prince to have

used a cart?"

"What do you mean?"

"Why you said just now that he

used to carry coal along the streets?"

Floods are now threatening the

suburbs of Saskatoon.

Three Oddfellows' lodges in the

city of Detroit have a combined

membership of 5586.

Books, when first printed, had their

leaves printed on one side only, the

blank sides being pasted together.

Mrs. Ambrose Small had submitted

an affidavit to the high court of Onta-

rio declaring her husband to be

legally dead. The will of Small is

now being probated.

The Sioux Indians are suing the

United States government for the

sum of \$750,000,000 for lands in the

Black Hills region claimed to have

been illegally taken from their reser-

vation and opened to white settle-

ment.

Some of the daily papers, in their

sensational reports of the floods in

this district, reported considerable

live stock lost. Upon enquiry we

learn that the most of the "animals"

lost were too small to be branded

and belonged to the insect-man-eating

# MODERN GOLF

By W. J. & Frank Thompson

NOTED CANADIAN GOLFERS

## BEGINNERS' FAULTS

I would like to warn beginners at the commencement of this article, against the impression that there is any short road to success in golf. In the last analysis success in the game rests solely and absolutely with the individual. No one can develop another's game. The best an instructor can do is to lay down broad principles such as maintaining balance at all times with the least expenditure of energy. Most of the instructor's time should be spent in giving the pupil clear ideas about the game, and then allowing each player to develop his own way of executing the shots.

The Wrong Way. Unfortunately this method is the exception and not the rule; too often the player's time is taken up trying to get the club to travel in a certain line and no other. This is an artificial way of learning the game and, I am convinced, is all wrong. In the first place, it reduces all players to a certain type of swing and the amazing thing about all the stars is that their swings, so far as detail goes, are all different, although there are certain general principles, such as balance, having the weight on the left foot at impact, and general flexibility of the body which are common to all.

It is all very well to say, as one other hears said, that in order to play the game one must start in childhood. But I would emphatically draw to the readers' attention the fact that there are numerous players who have been under the care of instructors since childhood who are, any thing but fine golfers. The reason for their mediocrity is that instead of being allowed to feel their way and play according to some preconceived conception of it, which, in most cases, has turned out subsequently to be wrong.

One of the leading professionals in Britain is credited with the remark that if he had a son he would simply give him a club and send him off to learn the game by himself, with no advice except, perhaps, to show him a good grip.

Where Mental Ties. Golf is largely mental. Given two players of equal physical ability, the one with the clearest conception of the swing will be the best player. All instruction, whether written or verbal, will be in vain unless it gives the student a clear conception of the essentials which, Heaven be praised, are not many.

One of the most glaring faults of the beginner is the attempt to use the body too much. Somehow or other the novice gets the idea that it is weight that is the important thing in golf. And in order to get weight behind the blow he forces the body into ungainly and ineffectual positions. This is all wrong, for we know it is the velocity of the swing which is the important factor. So long as the beginner attempts to throw the weight from one foot to the other little progress is possible for the simple reason that balance is difficult, if not impossible, to maintain. A distinct sway is introduced by this method so that the body either gets into the stroke ahead of the hands or lags behind them. In either case timing is destroyed, resulting in a topped or fouled ball. Ninety-nine players out of every hundred use the body too much. The chief duty of the body is to twist so that the hands may get into a hitting position. The smallest movement on the part of the body, compatible with this, the better.

Too Much Swaying. Beginners as a rule have an idea that it is necessary to indulge in wild tangling from one toe to the other. Nothing could be further from the

truth. One has only to watch Mitchell to realize how far the ball can be driven without swaying the body or taking the feet off the ground a great deal. Notwithstanding the lauded style of Vardon and Duncan, Mitchell possesses perhaps the simplest swing method from a mechanical and anatomical standpoint, and one which possesses few difficulties in copying.

Beginners, as a rule, make the game harder by taking on inordinately wide stance. One cannot always trust the feelings, and the feeling of the beginner that can drive the ball farther by straddling his feet, is a false one. I think, of all the star players, Mitchell keeps his feet closer together than any of the rest.

A Comfortable Stance. The beginner should take an ordinary stance, which is comfortable. This will enable him to keep the body relaxed and permit it to pivot without great strain.

Another fault common to the beginner and similar to excessive body movement, is seen in the use of the iron club. A spectator gets the impression that the player is trying to lift the ball up with the arms in a sort of scooping movement, which, of course, results in topping it. Contrary as it may seem, the reverse procedure is the correct way. Instead of the player trying to lift the ball up, he should actually try to drive it into the ground. When this method is followed a straighter ball with a certain amount of back spin follows.

Beginners as a class lack relaxation, which will be taken up in the closing article entitled "Ease vs. Effort." (Copyrighted British & Colonial Press, Limited.)

COWLEY RAPEININGS

The recent freshet did considerable damage to buildings along the rivers, together with washing out the approaches to the bridge over the Crowns river, two over the Livingstone and that over the Castle river on the main auto trail. The C. P. R. bridge over the Castle river has two piers damaged and is impassable. Altogether the district is cut off from communication east. Owing to the continued rains, the rivers have not abated sufficiently to allow of bridge repairs. Several townspeople were caught on the wrong side of the river and were unable to get home for several days. One tragedy is reported from Black Mountain, where Jack Kieley, an employee of the Porter ranch, is missing and his horse being found wet. It is feared that he has been drowned.

Owing to the interrupted train service, the mail is rather erratic. At present nothing is being transferred over the damaged bridge, all mail going west via Cranbrook and Golden.

Precipitation during May was eight inches, and two and a half inches in five days of June. Very little coarse grain has been sown, owing to continued wet weather.

Mr. Jack, manager of the Union Bank, was a visitor to Calgary over the week end.

Harvey Bouthiller was apprehended by the A. P. P. on June the 4th, on a charge of cattle rustling, complaint being laid by A. Yagos, of the South Fork, who missed a four-year-old steer and traced it to Bouthiller's ranch, where the police found sufficient evidence to warrant an arrest. The occurrence is rather unfortunate, as Mrs. Bouthiller is at present visiting in Edmonton and two boys aged 13 and 12 are left alone on the farm.

Mail on regular routes out of Cowley has to be dispatched by packhorse,

"FULLY EQUIPPED"

The Ford Car is "fully equipped". With the Ford Motor Company "fully equipped" does not mean unnecessarily equipped at high prices, with non-essentials to motoring satisfaction.

Seventy out of every one hundred people who bought cars in Canada last year bought Ford cars and placed their stamp of approval upon this policy.

A. M. MORRISON Coleman, Alberta

FORD MOTOR COMPANY OF CANADA, LIMITED, FORD, ONTARIO

all roads being impassable to vehicles.

A ministry of the gospel usually finds it his duty to keep his flock on the straight and narrow path, but seldom is he called upon literally to walk it himself, as befell Mr. Munro, who was marooned by the flood on the wrong side of the river and only got into town Sunday morning in time for service by constructing a narrow plank bridge, and by a balancing feat made the crossing.

Eugene Cripud, French ring idol, defeated Johnny Kilbane in a world featherweight champion contest at New York on June 2nd. Kilbane was knocked out in the sixth round.

At Bassano on Thursday last the rain fell measured 6.77 inches. The Bassano Mail reports it as a real eldritch. They had 8.85 inches of rain in that district last week.

Long Beach, California, has repealed its bathing by-law, which required a swimmer to wrap up like a mummy and required law enforcement inspectors to see that bathing suits had skirts half way to the knees, arm holes a few inches in width, etc. It was found that the measure was costly to enforce and inspectors wasted too much time sitting 'em up.

Contractor Abercrombie is down from Calgary this week.

## Declares Russia Will Not Yield Further To British Demands

Moscow.—The Soviet Government is gravely considering the latest demands of Great Britain in the Russo-Russian dispute which are reported to include insistence upon the withdrawal of the Russian representatives from Persia and Afghanistan, where they have been accused of anti-British propaganda. While no instructions to Leonid Krasin, Soviet representative in London have yet been forwarded the tone of the official press indicates that Russia will not likely yield further.

"The whole affair now rests with British public opinion," says the *Avestia*, in declaring that the appetite of Lord Curzon, the British Secretary for Foreign Affairs, "is growing for the east," and that he is striving for a break. "The Soviet Government," it adds, "has done everything possible to preserve peace and cannot be blamed if the results are not satisfactory."

The newspaper, *Laboring Moscow*, says: "Let England know, we will not yield to the demands regarding the so-called propaganda in the east."

The crux of affairs seems to be Lord Curzon's demand for the recall of Shumatsky, Russian representative in Persia, and Lieut. Rasokolnik, representative at Kabul, Afghanistan, and disciplinary punishment for M. Rothenstein, former Russian representative in Persia, who only recently was elevated to a post in the commissariat of foreign affairs.

Laboring Moscow says that Signor Amadori, a representative of Italy, in Moscow, alleged in political quarters to be the author of cypher dispatches advocating a break with Russia, is leaving for Rome, never to return.

The appearance near the Murmansk coast of two British cruisers, gunboat and several armed trawlers is reported by the Moscow newspapers, which comment upon the possible significance of the warships coming.

## Britain Retains Blasphemy Laws

Earl Russell's Bill Refused Second Reading in House of Lords

London.—The House of Lords made short work of the Earl of Russell's bill to amend the blasphemy laws refusing second reading by a majority of 68 votes. The object of the measure was to provide that no criminal proceedings should be instituted for schism, heresy, blasphemy or atheism.

"Abolish the blasphemy laws," the Earl of Russell said, "and there will still be protection against offensive language used in public and calculated to endanger the peace."

Lord Tullamore, speaking from his legal experience, pointed out that the present law was a protection for ordinary occasions. He was not afraid of any practical effects which the bill might have on organized Christianity, but thought it might be extremely mischievous in its indirect fashion. On the advice of the Marquis of Salisbury, speaking for the Government, second reading was rejected.

## Colonization Association Is To Be Reorganized According To Report

Winnipeg.—It is reported that the Canada Colonization Association is to be reorganized immediately upon a new basis, with the Federal Government, the Canadian Pacific Railway and the Canadian National Railway equally represented upon a new board of directors.

It is stated that M. A. Brown, president of the association since its inception, has resigned that position and that a meeting will be held in Winnipeg to complete the reorganization. It is stated that D. C. Coleman and Col. J. B. Denais, for the Canadian Pacific; and A. E. Warren, Vice-President, and General Manager of Western Lines, for the Canadian National; and Dr. W. J. Black, Deputy Minister of Immigration, will have places on the new board.

It is added that the Canadian Pacific and the Canadian National Railway have agreed to contribute \$100,000 a year for five years toward the funds of the organization to be added to the general grant.

According to another report, Sir W. M. U. 1475

## FUEL PROBLEM REPORT

NEED OF EDUCATING PUBLIC AWAY FROM USE OF ANTHRACITE

Ottawa.—Methods of meeting the fuel problem are suggested in an interim report issued by the Dominion Fuel Board. The board was organized by order-in-council in November last, under the chairmanship of Charles Cannell, Deputy Minister of Mines. It points out that in the ten-year period ending 1921 Canada's bill for imported coal exceeded the sum of \$680,000,000, and emphasizes that the ideal solution of the fuel problem is dependence upon our own fuel resources.

The report urges: Wider range of utilization of the coals of British Columbia, Alberta and the Maritime Provinces.

Investigation into the feasibility of establishing by-product recovery collecting plants.

That peat should be utilized to supply a portion of the fuel needs of Central Canada.

That our wood resources, under proper management, could be utilized for fuel to a greater degree than at present.

The board is of the opinion that, except in an auxiliary capacity, electric house heating is impracticable on a large scale, but electricity for industrial and transportation purposes would set free a large amount of coal for heating. The report concludes with a word as to the need of educating the public away from anthracite.

## Barbot Has Brought Glider To America

Intends Attempting Trip From New York to Chicago

New York.—Georges Barbot, the French aviator, who won 25,000 francs by gliding across the English Channel in his "baby" motorized homeplane, arrived from Le Havre, on the steamer Chicago, accompanied by the craft in which he hopes to soar from New York to Chicago. He will attempt to glide to Chicago to demonstrate that "air gliding" over long distances is now entirely feasible.

Train Falls 60 Feet Into River  
Moscow.—A dispatch from Chita, capital of the Far Eastern republic, reports that a passenger train in the Chita-Amur region was wrecked on May 24, with the loss of many lives. The train fell from a bridge into a river, a distance of 60 feet. Twenty-eight bodies have thus far been recovered and it is believed that forty more are still in the river. More than one hundred persons were injured.

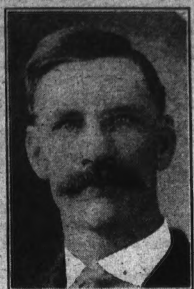

Bishop Laments Lawlessness

Kingsford, Ont.—In his annual charge at the opening of the 57th session of the synod of the diocese of Ontario in St. George's Cathedral, Bishop Hildwell deplored the conditions prevailing in a great part of the world today, pointing out that there had been a spirit of lawlessness spreading over the world and that Canada was not entirely free of this way.

Execute Irish Bank Robbers

Dublin.—Michael Murphy and Joseph O'Rourke were executed by the Free State authorities at Tiam, County Galway. They were convicted of participating in a bank robbery at Athenry.

## WESTERN EDITORS

John W. Johnston, Editor and Proprietor of The Times, Alliance, Alta.

## HOPPERS DAMAGING CROP

PLAGUE BREAKING OUT BADLY IN SOUTHWESTERN SASKATCHEWAN

Regina.—Millions of grasshoppers menace the growing crops in the southwestern district, west of Assiniboia, Sask. More damage has already been done this year than was suffered in the province during the whole of last season, according to H. F. Auld, Deputy Minister of Agriculture, and control of the pest depends entirely upon the co-operation of the farmers in the districts affected with officials of the Field Crops Branch of the Dept. of Agriculture and municipal officers, who are fighting the hoppers with poison bait.

The locusts will continue to destroy crops until the end of June or the first week in July, when they begin to fly. After that damage will not be so severe.

M. P. Tullis, Field Crops Commissioner, has gone to Assiniboia to personally direct the fight. Mixing stations have been established where farmers may secure bait made of a mixture of bran, sawdust, salt, arsenic and amy acetate.

DeLorme Trial May Be Delayed  
Montreal.—The trial of Abbe Adolphe DeLorme on the charge of murdering his half brother, Raoul DeLorme, may not be held until the September term of the Court of King's Bench here, according to R. L. Calder, K.C., crown prosecutor.

Adopt Reich Budget

Berlin.—The council of the Reich adopted the budget for 1923, as passed by the Reichstag. The budget shows a deficit of 12,400,000,000 marks.

## Committee On Agriculture Hear Protests On The Sale Of Oleomargarine

### NORTH BAY DESPERADO KILLED

LEO ROGERS, WHO KILLED TWO CONSTABLES, IS SHOT DEAD

North Bay.—Leo Rogers, North Bay desperado and slayer of two constables, is dead, being shot and killed by a posse. The escaped desperado emerged from the bush about eight miles from Nipissing, long enough to be brought down by a bullet from a member of Inspector Storey's party, which, with several other groups, had been hunting Rogers since his escape from a crowded court room with a flourish of a cardboard pistol, some two weeks ago.

The killing of Rogers came as the climax to one of the most dramatic episodes in this history, has ever experienced. "Bad Leo" brought down two of his pursuers and wounded another before he himself was dropped by a bullet. He shot Detective Fred Lafabre shortly after his sensational escape, and sent a bullet through the heart of Sergeant John Ureghart, of the Provincial Police, a member of a party that surprised the gunman in his father's house.

Speakers were D'Arcy, General Counsel; E. H. Stonehouse, President of the Dairy Council; E. T. Love, Secretary of the Alberta Dairywomen's Association; and W. A. Wilson, Regina, Saskatchewan Co-operative Creamery Company.

Belgian Scheme For Reparations

Proposes Monopoly of Certain German Commodities and Exploitation of Railroads

Paris.—Belgium's reparations plan, according to Le Matin, suggests the formation in the Reich of monopolies in such commodities as alcohol, sugar and tobacco, together with the exploitation of the railroads and state property. The proposed monopolies would be managed by international syndicates on which the Allies would be well represented.

The newspaper says Premier Theunis believes that the Allies would furnish a minimum of 2,400,000,000 gold marks annually. It would have the advantage of making Germany's debt a commercial one and would mean that she would find ways of meeting it within her own borders, thus making it unnecessary for the French and Belgians to relinquish their pledges.

Would Increase Air Force

London.—A meeting of the Air League at the Mansion House adopted a resolution demanding a one-power standard air force for Great Britain and the fullest development of imperial air routes.

Lord Birkenhead, who addressed the gathering, declared "we are quite determined in the event of an air attack."

## TO TOUR AGRICULTURAL CANADA

Four English boys photographed aboard the Canadian Pacific steamer "Monticini" prior to sailing from England.

It is very much to be doubted if four happier boys ever arrived in Canada than Clifford White, Gordon Salter, Joseph Murray and Leonard Grimmer, recent passengers on the Canadian Pacific steamship *Monticini*. Singular opportunity has come to these boys, whose lives have been largely circumscribed by their small villages in England, to cross the Atlantic, to see the wonders of Canada and her modes of agriculture, and having seen and learned to use their knowledge, to the advantage of boys other than themselves.

Some time ago the London Daily Mail organized a movement known as the "Young Farmer's Clubs of Great Britain," along similar lines to those operated in Canada and the United States for the purpose of encouraging boys in specialized farming. Pig clubs, calf clubs, poultry clubs and a host of other clubs were formed in almost every farming community in the British Isles and various competitions brought about much enthusiasm among the young farmers.

The idea was conceived of promoting a spirit of emulation and competition between the agricultural students of the Motherland and Canada, and giving those of England a more comprehensive understanding of farming conditions overseas. E. W. Beatty, President of the Canadian Pacific Railway, who is an active worker among boys was approached, and

through his generosity it was made possible for these four boys, prize winners among all the boys' agricultural clubs of Great Britain, to come to Canada tour the Dominion and take a full summer course at an Alberta agricultural college.

The benefits which may follow in the wake of their visit are manifold. Upon their return to England the diaries which they are keeping will be edited and published by the Daily Mail and various farm journals, and the minds of other boys in the various clubs will no doubt be turned to the advantages Canada has to offer. An immigration flow of such a class, even eventually, should be from Canada's standpoint, the most valuable and profitable.

## Discuss Livestock Problems

Railway Men and Western Stock Growers Hold Conference

Calgary.—At a meeting held at the Pullman Hotel in Calgary between Messrs. Todd, Stephen and McKean, representing the Canadian Pacific Railway, and Messrs. Fair and Rosevear, representing government railway stock growers association, many problems affecting the livestock industry were discussed. A very satisfactory hearing was given the stock growers and the feeling prevails that much good will result from this conference.

## Asks Armed Action Against Brigands

Americans Held By Chinese Outlaws Suggest Foreign Intervention

Tien Tsin.—An armed intervention by the foreign powers to put down banditry in China is favored by Major Roland W. Piger, U.S.A., one of the 14 foreigners held by outlaws of Pao-chu Mountain. He expressed this opinion in a letter to the Associated Press received here.

Shanghai.—Major Robert A. Allan, of the United States army and W. Smith, of Manchester, England, who were captured by bandits May 6 have been released, according to advices received here.

## Scottish Firm Has Closed Big Deal

Taking Over 2,000,000 lbs. of Saskatchewan Butter This Summer

Regina.—Negotiations have been closed whereby the entire exportable butter output of the Saskatchewan Co-operative Creameries during the summer months will be sold to Andrew Clements & Co., produce merchants, with headquarters at Glasgow, Scotland.

The order was placed by Sir Thomas Clements following a lengthy conference with the local creamery directors. The deal will result in the Scottish firm handling between two and three million pounds of Saskatchewan butter.

Pilsudski Resigns

Warsaw.—Marshal Joseph Pilsudski, former president of Poland, has resigned as chief of the general staff and in radical circles it is said he will withdraw entirely from the army.

## Declares Russia Will Not Yield Further To British Demands

Moscow.—The Soviet Government is gravely considering the latest demands of Great Britain in the Anglo-Russian dispute which are reported to include insistence upon the withdrawal of the Russian representatives from Persia and Afghanistan, where they have been accused of anti-British propaganda. While no instructions to Leonid Krasin, Soviet representative in London have yet been forwarded the tone of the official press indicates that Russia will not likely yield further.

"The whole affair now rests with British public opinion," says the review, in declaring that the appetite of Lord Curzon, the British Secretary for Foreign Affairs, "is growing as he eats," and that he is striving for a break. "The Soviet Government," it adds, "has done everything possible to preserve peace and cannot be blamed if the results are not satisfactory."

The newspaper, *Iskra*, Moscow, says: "Let England know we will not yield to the demands regarding the so-called propaganda in the east."

The crux of affairs seems to be Lord Curzon's demand for the recall of Shumatski, Russian representative in Persia, and Leonid Krasin, representative at Kabul, Afghanistan, and disciplinary punishment for M. Rothenstein, former Russian representative in Persia, who only recently was elevated to a post in the commissariat of foreign affairs.

Leaving Moscow says that Signor Amadori, a representative of Italy, in Moscow, alleged in political quarters to be the author of cypher dispatches advocating a break with Russia, is leaving for Rome, never to return.

The appearance near the Murmansk coast of two British cruisers, gunboat and several armed trawlers is reported by the Moscow newspapers, which comment upon the possible significance of the warship coming.

## Britain Retains Blasphemy Laws

Earl Russell's Bill Refused Second Reading in House of Lords

London.—The House of Lords made short work of the Earl of Russell's Bill to amend the blasphemy laws refusing second reading by a majority of 88 votes. The object of the measure was to provide that no criminal proceedings should be instituted for schism, heresy, blasphemy or atheism.

"Abolish the blasphemy laws," the Earl of Russell said, "and there will still be protection against offensive language used in public and calculated to endanger the peace."

Lord Phillimore arguing from his legal experience, pointed out that the present law was a protection for ordinary occasions. He was not afraid of any practical effects which the bill might have on organized Christianity, but thought it might be extremely mischievous in an indirect fashion. On the advice of the Marquis of Salisbury, speaking for the Government, second reading was rejected.

## Colonization Association Is To Be Reorganized According To Report

Winnipeg.—It is reported that the Canada Colonization Association is to be reorganized immediately upon new basis, with the Federal Government, the Canadian Pacific Railway and the Canadian National Railway equally represented upon a new board of directors.

It is stated that M. A. Brown, president of the association since its inception, has resigned that position and that a meeting will be held in Winnipeg to complete the reorganization. It is stated that D. C. Coleman and Col. J. S. Dennis, for the Canadian Pacific; A. E. Warren, Vice-President and General Manager of Western Lines, for the Canadian National; and Dr. W. J. Black, Deputy Minister of Immigration, will have places on the new board.

It is added that the Canadian Pacific and the Canadian National Railways have agreed to contribute \$100,000 a year for five years toward the funds of the organization to be added to the general grant.

According to another report, Sir

## PRAYER FOR PEACE

PRESIDENT HARDING MAKES NOTABLE ADDRESS AT WASHINGTON

Washington.—Standing in Arlington Memorial Amphitheatre and facing the wooded slopes where rest thousands of the war dead of the nation, President Harding uttered a prayer that the United States "do full part toward making war unlikely, if not impossible."

"We have already proved that we can have less of armament," the President declared. "Let us strive for the assurance that we shall have none of war."

Scarcely had the applause from those assembled in the great national cemetery for the annual Memorial Day exercises died away, when the chief executive, coupled with the prayer the hope that should war again come to America, "we will not allow call to service the youth of the land—but we will draft every resource, every activity, all of wealth and make common cause of the nation's preservation."

Several minutes passed before the applause which greeted this pronouncement allowed Mr. Harding to continue.

## Trade Treaty With France

Bill Introduced Into Senate Is Given Second Reading

Ottawa.—The Senate gave second reading to the bill to give effect to the trade treaty with France and adopted in committee all clauses except three of the combines bill.

Speaking on the French Treaty, Senator Beaulieu said there were two conditions which made trade with France difficult at the present time, the depreciation in the value of the franc and the lack of knowledge by the French people of Canadian production. Once the franc regained its nominal value, and there was a fair prospect of this being accomplished shortly, trade with France would be very valuable.

He instanced the development of Canada's canned salmon trade with France as an example of what could be done by educating the French people to the possibilities of Canadian trade.

Bishop Lamer's Lawlessness  
Kingston, Ont.—In his annual charge at the opening of the 57th session of the synod of the diocese of Ontario in St. George's Cathedral, Bishop Maitland deplored the conditions prevailing in a great part of the world today, pointing out that there had been a spirit of lawlessness spreading over the world and that Canada was not entirely free of this wave.

Execute Irish Bank Robbers  
Dublin.—Michael Murphy and Joseph O'Rourke were executed by the Free State authorities at Tuam, County Galway. They were convicted of participating in a bank robbery at Athenry.

## FUEL PROBLEM REPORT

NEED OF EDUCATING PUBLIC AWAY FROM USE OF ANTHRACITE

Ottawa.—Methods of meeting the fuel problem are suggested in an interim report issued by the Dominion Fuel Board. The board was organized by order-in-council in November last, under the chairmanship of Charles Campbell, Deputy Minister of Mines. It points out that in the ten-year period ending 1921 Canada's bill for imported coal exceeded the sum of \$800,000,000, and emphasizes that the ideal solution of the fuel problem in dependence upon our own fuel resources.

The report urges: "Wider range of utilization of the coals of British Columbia, Alberta and the Maritime Provinces."

Investigation into the feasibility of establishing by-product recovery cooking plants.

That peat should be utilized to supply a portion of the fuel needs of Central Canada.

The use of wood resources, under proper management, could be utilized for fuel to a greater degree than at present.

The board is of the opinion that, except in an auxiliary capacity, electric house heating is impracticable on a large scale, but electricity for industrial and transportation purposes would set free a large amount of coal for heating. The report concludes with a word as to the need of educating the public away from anthracite.

## Barbot Has Bought Glider To America

Intends Attempting Trip From New York to Chicago

New York.—Georges Barbot, the French aviator, who won 25,000 francs by gliding across the English Channel in his "baby" motorized monoplane, arrived from La Havre, on the steamer Chicago, accompanied by the craft in which he hopes to soar from New York to Chicago. He will attempt to glide to Chicago to demonstrate that "air gliding" over long distances is now entirely feasible.

Train Falls 60 Feet Into River  
Moscow.—A dispatch from Chita, capital of the Far Eastern republic, reports that a passenger train in the Chita-Amur region was wrecked on May 24, with the loss of many lives. The train fell from a bridge into a river, a distance of 60 feet. Twenty-eight bodies have thus far been recovered and it is believed that forty more are still in the river. More than one hundred persons were injured.

## TO TOUR AGRICULTURAL CANADA

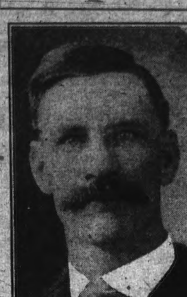

Four English boy farmers photographed aboard the Canadian Pacific steamer "Montana" before sailing from England.

It is very much to be doubted if four English boys ever arrived in Canada than Clifford White, Gordon Sater, Joseph Murray and Leonard Grimmer, recent passengers on the Canadian Pacific steamship *Montana*. Singular opportunity has come to these boys, whose lives have been largely circumscribed by their small villages in England, to cross the Atlantic, to see the wonders of Canada and her modes of agriculture, and having seen and learned, to use their knowledge to the advantage of boys of their own kind.

Some time ago the London Daily Mail organized a movement known as the "Young Farmer's Clubs of Great

## HOPPERS DAMAGING CROP

PLAQUE BREAKING OUT BADLY IN SOUTHWESTERN SASKATCHEWAN

Regina.—Millions of grasshoppers menace the growing crops in the southwestern district, west of Assiniboia, Sask. More damage has already been done this year than was suffered in the province during the whole of last season, according to H. F. Auld, Deputy Minister of Agriculture, and control of the pest depends entirely upon the co-operation of the farmers in the districts affected, with officials of the Field Crops Branch of the Dept. of Agriculture and municipal officers, who are fighting the hoppers with poison bait.

The locusts will continue to destroy crops until the end of June or the first week in July, when they begin to sever.

M. P. Tallis, Field Crops Commissioner has gone to Assiniboia to personally direct the fight. Mixing stations have been established where farmers may secure bait made of a mixture of bran, sawdust, salt, arsenic and amycol acetate.

## Delmore Trial May Be Delayed

Montreal.—The trial of Abbe Adolphe Delmore on the charge of murdering his half brother, Raoul Delmore, may not be held until the September term of the Court of King Bench here, according to R. L. Calder, K.C., crown prosecutor.

## Adopt Reich Budget

Berlin.—The Reichstag of the Reich adopted the budget for 1923, as passed by the Reichstag. The budget shows a deficit of 12,400,000,000 marks.

## Committee On Agriculture Hear Protests On The Sale Of Oleomargarine

## NORTH BAY DESPERADO KILLED

LEO ROGERS, WHO KILLED TWO CONSTABLES, IS SHOT DEAD

North Bay.—Leo Rogers, North Bay desperado and slayer of two constables, is dead, being shot and killed by a posse. The escaped desperado emerged from the bush about eight miles from Nipissing, long enough to be brought down by a bullet from a member of Inspector Storey's party, which, with several other groups, had been hunting Rogers since his escape from a crowded court room with a flourish of a cardboard pistol, some two weeks ago.

The killing of Rogers came as the climax to one of the most dramatic manhunt stories this territory has ever experienced. "Bad Leo" brought down two of his pursuers and wounded another before he himself was dropped by a bullet. He shot Detective Fred Lefebvre shortly after his sensational escape and sent a bullet through the heart of Sergeant John Urquhart, of the Provincial Police, a member of a party that surprised the gunman in his father's house.

## Soviets Are Vindictive

Reported That Swiss Residents In Russia Are Persecuted

Berne.—Although the Soviet authorities deny acts of revenge against Swiss residents in Russia for the assassination of M. Vorovsky, at Lagnanne, advices received from some of the Swiss in that country report that Communists have organized a regular programme against them. At Odessa, the chairman of the Swiss colony has been killed and two other prominent Swiss residents have been badly injured. Numerous Swiss have been arrested at Petrograd, Moscow and Kiev and Swiss stores pillooted.

## Would Increase Air Force

London.—A meeting of the Air League at the Mansion House adopted a resolution demanding a one-pow standard air force for Great Britain and the fullest development of Imperial air routes.

Lord Blandford, who addressed the gathering, declared "we are quite defenceless in the event of an air attack."

## Belgian Scheme

For Reparations

Propose Monopoly of Certain German Commodities and Exploitation of Railroads  
Paris.—Belgium's reparations plan, according to Le Matin, suggests the formation in the Reich of monopolies in such commodities as alcohol, sugar and tobacco, together with the exploitation of the railroads and state property. The proposed monopolies would be managed by international syndicates on which the Allies would be well represented.

The newspaper says Premier Thaulieu believes that this plan would furnish a minimum of 2,400,000,000 marks annually. It would have the advantage of making Germany's debt a commercial one and would mean that she would find ways of meeting it within her own borders, thus making it unnecessary for the French and Belgians to relinquish their pledges.

## Discuss Livestock Problems

Railway Men and Western Stock Growers Hold Conference

Calgary.—At a meeting held at the Palliser Hotel in Calgary between Messrs. Todd, Stephen and McKean, representing the Canadian Pacific Railway, and Messrs. Finner and Rose, representing government railroads, and Messrs. Riley, Cross, MacLean and Elliot, representing western stock growers association, many problems affecting the livestock industry were discussed. A very satisfactory hearing was given the stock growers and the feeling prevails that much good will result from this conference.

## Asks Armed Action

Against Brigands

Americans Held By Chinese Outlaws Suggest Foreign Intervention

Tien Tsin.—An armed intervention by the foreign powers to put down banditry in China is favored by Major Roland W. Pinger, U.S.A., one of the 14 foreigners held by outlaws on Pao-tzu Mountain. He expressed this opinion in a letter to the Associated Press received here.

Shanghai.—Major Robert A. Allan, of the United States army and W. Smith, of Manchester, England, who were captured by bandits May 6 have been released, according to advices received here.

## Scottish Firm Has

Closed Big Deal

Taking Over 2,000,000 lbs. of Saskatchewan Butter This Summer

Regina.—Negotiations have been closed whereby the entire summer output of the Saskatchewan Co-operative Creameries during the summer months will be sold to Andrew Clements & Son, produce merchants, with headquarters at Glasgow, Scotland. The order, which was placed by St. Thomas Clements following a lengthy conference with the local creamery directors. The deal will result in the Scottish firm handling between two and three million pounds of Saskatchewan butter.

## Pileuski Resigns

Warsaw.—Marshal Joseph Pileuski, former president of Poland, has resigned as chief of the general staff and in radical circles it is said he will withdraw entirely from the army.

An exchange says a patriot is a man who can sing "O Canada" while making out his income tax return.

Cyril Ashurst, fourteen-year-old son of Mr. and Mrs. William Ashurst, died at Coleman last week of pneumonia.

Rev. W. L. Hollingsworth, recently elected president of the Alberta Methodist conference, came to this province from Newfoundland.

G. Miller, mechanic at the Crow's Nest Pass Motors, returned last week end from Orion. He is accompanied by his bride.

Fines aggregating \$300 were recently exacted against a number of Doukhobor children near Nelson for non-attendance at school.

Someone has discovered that it takes one hundred and forty nuts to hold a Ford together, and only one to hold it on the road.

Dr. Tolmie, of Taber, and Dr. Stewart, of Winnipeg, have been chosen by the Miners' Unions of Coleman, to succeed Drs. Davis and Scott.

When a school boy was told that icebergs had drifted south from the North pole, he asked: "Why didn't they hitch 'em on strong?"

The old maids of Blairmore have decided to discontinue their annual conventions, as they find that such gatherings bring them too close to being popular.

Mr. Percival Driver, of the Royal College of Music, London, is in the Pass, examining the pupils of Miss Helen Garval, of the Lethbridge Conservatory of Music.

A movement is afoot urging the indemnifying of George S. Armstrong, who was recently acquitted of a charge laid against him of robbing the mails of a large sum of money.

Michael "Umbrella" Boyle, a Chicago labor leader, was recently sentenced to six months in jail and to pay a fine of \$1000 for refusing to talk to the court.

Now there's so much of the other fellows land mixed up with yours, and so much of yours mixed up with the other fellows' that we doubt if even the land titles office can decide just which is which.

Joe Grafton was up from Sunburst last week end. Joe is still boosting the oil and gas prospects of Sunburst and is really overflowing with natural gas himself. It is Mr. Grafton's plan to entertain a regiment of Passites in his oil district shortly.

**IN THE SUPREME COURT OF ALBERTA—JUDICIAL DISTRICT OF MACLEOD**

Between: Martha Barclay Crawford Morton, Plaintiff,

and Robert Pitblado Morton, Defendant.

**TO ROBERT PITBLADO MORTON: NOTICE OF TRIAL**

TAKE NOTICE that trial of this action to take place at the Court House, in the City of Calgary, Province of Alberta, at the sitting of this Court, commencing on Tuesday, the 26th day of June, A.D. 1928, at the hour of 10 o'clock in the forenoon, or so soon after as the case can be heard or orders or directions made for the hearing of the said action.

DATED at Blairmore, in the Province of Alberta, this 25th day of May, A.D. 1928.

L. H. PUTNAM, Solicitor for the Plaintiff.

Seven persons were killed and several injured in an auto crash at Detroit on May the 27th.

Seattle schools were visited by about 250 British Columbia teachers on Saturday last.

A carload of whiskey and gin, billed for Montreal as merchandise, was seized at Vancouver recently.

President Poincaré, of France, tendered his resignation recently, but it was not accepted.

A shipment of meats was brought in by teams from Pincher Creek on Tuesday to relieve the local shortage. Owing to the washout at the South Fork bridge between Pincher and Cowley, the teams were obliged to come in by way of Beaver Mines.

Through the generosity of Mr. A. B. Trites, the Fernie Rotary Club are this year in a position to repeat their practice of awarding prizes for beautiful home surroundings, gardens, etc. This year he has given \$150 for this purpose.

A very critical operation was performed by Dr. Connor and his associates at Lethbridge last week by Mrs. Jack Lawless, of Blairmore. We understand that the operation was most successful and that Mrs. Lawless is fast recovering.

The Lethbridge Herald reported that a dance and social was given at Hillcrest by Mr. W. Stevenson on the night of May 27th (Sunday), at which about seventy couples were present. We might say that the affair took place on the night of Friday, May 25th.

Twenty years ago today an order was issued prohibiting the operation of nickel-in-the-slot musical machines as they were encouraging young boys to gamble. So many reforms have taken place since that time that today the slot machine is legalized as a necessary evil.

At a prohibition meeting held by the Salvation Army at Winnipeg, Dr. Leslie Pidgeon stated that the liquor bill for Great Britain for 1921 was two billion dollars. Britain has asked the United States for sixty years in which to pay its war debt of four billion dollars, while its liquor bill would pay for it in a little over two years.

If the simpering, snub-nosed, tight-skirted, face-be-daubed, titillating little ninny, who stuck her gum on our office chair on Thursday evening last and permitted the editor to sit down on it, will call at our office again she can have the gum back. It is on the southern front of our spare trousers. If she can't get the gum off, she can have the pants too.

Ten thousand dollars has been offered for information that might lead to the solution of the mystery surrounding the disappearance two years ago of Leighton Mount, a freshman, at Chicago. A skeleton believed to be that of Mount was found recently under a pier.

A chemist has pointed out that a small quantity of the new "sneezing gas" introduced into illuminating gas during its manufacture would prevent many accidental deaths from asphyxiation; and those who should try to commit suicide by the use of gas would find it impossible—unless they sneezed themselves to death.

At the annual convention of the Maritime Grand Lodge, Knights of Pythias, to be held at Moncton, New Brunswick, this month, the memorial to the late John Beamish, founder of the order in Canada, will be unveiled.

When Sam came home he found a strange dorky with his arms around Mandy's waist. "Mandy, tell that nigger to take his arm from 'round your waist," he indignantly ordered. "Tell him yourself," he's a perfect stranger to me," said Mandy.

## Local and General Items

**For funeral services phone 232, Crow's Nest Pass Undertaking Co.**

Hundreds of families are homeless as a result of recent fires in Ontario.

The regular fortnightly meeting of the town council will be held on Monday night next.

Wouldn't it be fun to see a barber shaving himself and arguing that he didn't need a massage.

Always turn lights out in the cellar. Friends are liable to think you are having a party.

A "pig" club in Blairmore would be alright, but most of those qualified otherwise are too mean to join.

Mrs. (Dr.) Moore, of Duchesse, and little son, have been guests at the Pearson home in West Blairmore for a few days.

At the request of the Manitoba government, Premier King will bring down legislation to abolish the grand jury system.

When a local teacher asked: "How old would a person be who was born in 1890?" a little boy retorted: "Mar or woman?"

Excavation for the basement and foundation of the new theatre is progressing as weather permits.

Sir Auckland Geddes, British ambassador to Washington, has been stricken nearly blind, the result of a gas attack during the war.

The British freighter Oxonian, with a cargo of Canadian cattle for England, collided with an iceberg off the coast of Newfoundland, but made the port of St. John's, where temporary repairs were effected.

The first wearer of the latest style split skirt on the streets of Paris recently blocked traffic for some hours. She was requested to don a cloak to screen her flashing limb encased in \$13 stockings.

For the benefit of the editor of the Coleman Journal, we might state that we have had absolutely no connection with "sport dope" appearing in the Lethbridge and Calgary daily papers.

When the wages of Lyon Creek were at their highest on Friday afternoon last, a small house started down stream. Hitting the railway bridge it crumbled to almost matchwood. After the debris had cleared away one of the windows was picked up and found to be intact, with not a glass broken.

Leo Rogers, the fugitive man killer, was shot and killed by a posse on Thursday night of last week. The escaped desperado emerged from the bush about eight miles from Nipissing late in the afternoon, long enough to be brought down by a bullet from a member of the provincial police.

Three auto loads of tourists reached Blairmore on Sunday night from Saskatchewan points. During their stay here on Monday they secured pictures of our campsite, which was flooded four feet deep in water. They entrained with their cars and equipment on Tuesday afternoon for Fernie.

Edgar Elmo Trider, former Calgary traveller, was acquitted by a jury on Friday last on a charge of murdering Constable Charles Paris, of the Drumheller town police, after the jury had been absent only twenty minutes. Upon agreement by counsel to pay fines, Trider was also released on a charge previously laid under the Alberta Liquor Act, and on which he was acquitted. Trider was defended by A. A. McGilivray, of Calgary.

Joseph McDougall, of the local Home Bank staff, is holidaying at Fernie.

Mr. Reid, manager of a general store at Corbin, was in town on Monday.

To be dissipated is to use the first half of your life to make the second half miserable.

J. Harper, of Calgary, rode from Calgary to Spokane on a bicycle in seven days.

The Alberta Optometric Association is in convention at Edmonton this week.

School re-opened yesterday afternoon, following a week's tieup on account of the flood.

There were thirty-four applicants for the two positions as doctor to the Coleman local union.

A number of C. P. R. station men have been laid off in this district on account of the flood and slackness.

A man named Henri Marquis lost his life in the Old Man river near Macleod on Monday.

One house along Riverside Avenue lost its foundation and is suffering considerable of a twist.

With the recent rains, Alberta will probably see the greatest bumper crop in its history.

A woman named Anna Boyd attempted to suicide by shooting herself through the body at the West hotel, Vancouver.

Fifty cases of liquor were stolen from the Greenwood government liquor store house near Nelson on Friday night last.

There will be a special meeting of the Blairmore Board of Trade at the office of the Crows' Nest Pass Motors tonight at 8 o'clock.

Mrs. Margaret R. Huff, of the Royal Academy of Music, is in The Pass this week, examining the pupils of Mr. W. Moser, of the Alberta Conservatory of Music.

The C. P. R. have adopted a new schedule and until further notice passenger trains will leave Blairmore, eastbound at 3:15 p.m., and westbound at 6:20 p.m.

Miss Jean McMahon returned from a visit to her home at Taber on Monday. Miss McMahon's mother, who sustained a fractured skull a few weeks ago, is progressing favorably.

The S.S. Leviathan, formerly the German liner Vaterland, now the greatest vessel in the world in point of tonnage, has been converted into an oil burner at a cost of \$5,500,000.

No particulars are at hand regarding the death of Frank Ciccarelli, which occurred recently at Edson, Alberta. Mr. Ciccarelli was at one time resident of Blairmore, occupying the position of pit foreman with the Rocky Mountain Cement Co., and later conducting a small grocery store here.

The A. P. P. frustrated a daring attempt, to rob the Manyberries branch of the Canadian Bank of Commerce on Sunday morning. The bandits reached the outskirts of the town by auto and from there scattered in various directions, some towards the telephone exchange, some towards the police barracks. The police had been warned and equipped vantage points and in a few moments the gang were greeted with a fusillade of bullets that caused them to retrace themselves and make retreat.
